Prices Effective July 1, 2020

Zero Turn Radius Commercial Grade Mower

2501 Griffin Avenue, Selma, AL 36701 800-363-6096 www.bushhog.com

IMPORTANT NOTICES

Machines included in this price book conform to safety standards applicable to the products at the time of manufacture and may include safety devices such as shields, guards, or operator protective devices. Under no circumstances should machines be operated without the safety devices in place.

Bush Hog® reserves the right to make changes and/or improvements in design and construction of parts or machines shown herein without notice or obligation.

ROTARY CUTTER OR FLAIL MOWER THROWN OBJECT PROTECTION

Bush Hog offers three types of shielding to protect the operator, passersby, livestock, and property from mower thrown objects: deflectors, single chain guards, and double chain guards. Shielding should be selected based on the intended use of the mower. Double chain guards or deflectors should be used for highway, right-of-way, parks, or greenbelt mowing or other mowing where human dwellings, vehicles, or livestock could be within 300 feet of the mower. Chain guards are more durable, provide longer service life, and require less maintenance than deflectors. Single chain guards should be sufficient for agricultural and other mowing where passersby or property are not within 300 feet of the mower during operation.

No shielding is completely effective in preventing thrown objects. The possibility of injury or property damage from this hazard can be substantially reduced by selecting proper shielding, maintaining the mower and shielding in good operating condition, inspecting the area for foreign debris before mowing, operating the mower at a minimum cutting height of 4", and keeping people at least 300 feet from the mower at all times during operation.

BUSH HOG® GUARANTEES EACH PIECE OF EQUIPMENT AGAINST DEFECTIVE MATERIALS AND WORKMANSHIP FOR A PERIOD OF ONE YEAR FROM DATE OF DELIVERY UNLESS OTHERWISE NOTED.
