Suspension Details

Standard Suspensions and Options			
Code	Title	Details	
A50	Front axle reinforced	Includes an increased load capacity of the front axle, where heavier bodies and equipment can be fitted. The higher capacity front axle caters to heavier cabs and heavier special equipment (e.g. for fire-fighting vehicles and ambulances).	
No Factory Code	Base Standard Factory Suspension	Description	Ride comfort due to reduced roll stabilization.
		Benefit	The Base Standard Factory suspension, has an adapted front suspension for a lower and more comfortable entry. With the removal of the rear stabilization bar it allows for an overall comfortable ride with reduced roll.
CB7	Stabilization Level I	Description	Roll Stabilization with height body damping
		Benefit	CB7 compensates for rolling behavior due to higher center of gravity of loads or bodies. Torsion bars with an increased diameter are added to the front and rear axels. Furthermore, shock absorbers with an adapted characteristic are installed.
CB8	Stabilization Level II	Description	Enhanced roll stabilization with higher body damping compared to CB7
		Benefit	Additional roll stabilization and body damping compared to CB7. Increases torsion bar diameters at the front and rear axles and provides an adapted shock absorber characteristic. Furthermore, rear axle springs with increased rigidity are installed.
CB4	Stabilization Level III	Description	Designed for vans with a intense rolling behavior due to a much heavier load and higher center of gravity. (i.e. recreational vehicles)
		Benefit	CB4 comes with larger diameter stabilizers, shock absorbers and with characteristics that are adapted for an increased rebound and compression curve. Furthermore, the leaf springs are increased in rigidity.
CB1	Suspension for comfort and load protection	Enhanced comfort due to adapted damper characteristics and the use of progressive spring characteristics.	
CT1	Rear spring vibration absorbers	Includes vibration absorbers fitted on the left and right rear spring and lowers the resonant vibrations of the rear springs, thus hindering noise development.	

Specialized Suspension Options			
Code	Title	Explanation	
CE8	Raised rear body mounts	Raised body on rear axle (35mm/1.4")	
B01	ESP for increased Center of Gravity	Description	Adjusted braking and handling characteristics for vehicles with increased center of gravity.
		Benefit	With code B01, the ESP® is optimized to reduce the vehicles tilt tendency with a total center of gravity of <u>more than 1000 mm (39.4 inches)</u> . It is essential to ensure that the vehicle is equipped with the right suspension and tires. With B01 it is required to also add CB8 or CB4.
X2R	Conversion to RV requirement	MBUX Timed Switch-off extended to 6 hours and B01 is automatically added to this code.	

Rear view camera/head unit plausibility

Cargo Van Floor Variations

Standard	V93	Without factory installed flooring
Options	V43	Wood floor with 6 D-rings
	VK8	Floor covering, plastic

Note: see restrictions in combination with metallic paint

Special Rule for cargo vans with metallic paint

Paint Code	5890/7755/7992/9197/9775	
Must have one of	V43	Wood floor with 6 D-rings
	VK8	Floor covering, plastic
	ZZ9	No floor covering; requires customer floor installation
		Package contains: V93 - No factory installed flooring VL4 - Metallic painted floor

Note: Fleet only

Additional comments ZZ9 Package

While applying the required clear coat layer to the metallic painted cargo floor, imperfections could occur. Therefore, we strongly recommend to install flooring in the cargo area for vehicles with a metallic paint.

Please be aware that potential paint appearance, contamination or imperfections of the uncovered cargo floor are not considered a defect and are therefore not reimbursable for repairs.

Tire & Wheel Overview

		1500/2500 Models		
		Standard Tire	RH8	Single tire
		Standard Wheel	RS3	Steel

To order any of the tire brands above code RM9 has to be added to order.

"Incomplete Vehicle" Packages - Fleet Only

If any of the below packages are ordered, vehicle will become an "incomplete vehicle"! In this case an upfitter will become the final stage manufacturer. Please note that the involvement of an upfitter is required to register the vehicle. We recommend working with one of our ExpertSolutions Partners.

For questions or further assistance please reach out to: vaninfo@mbusa.com

"RV Bundles" for Cargo and Cab Chassis Models

RV0 and RV1 are bundling essential product features specifically for RV upfits. MBUSA Product Management suggests that these bundles are added to any vehicle that will receive an RV-type upfit in order to allow an easier upfit process, enhanced technical usability as well as an improved driving performance tailored to RV vehicle characteristics.

Ordering Information

U-Codes can be added to the Purchase Order via the VII screen in NetStar OR by emailing the request to MBUSA Van Distribution (vandistribution@mbusa.com)

Don't forget to place your upfit order with the upfitter after you add the U-Code

U-Codes can be added/changed through D40 status. No changes permitted after D41 status

U-Codes will carry over for dealer traded vehicles

Any requests to remove a U-Code must be approved by the Van Distribution & Upfitter Management Departments

For more information on U-codes, please reach out to the Upfitter Management team:

upfitterinfo@mbusa.com

All information contained in this Reference Guide is based on the latest product information available at the time of publication. Mercedes-Benz USA, LLC and Daimler Vans USA, LLC reserve the right to make changes at any time, without notice, in colors, materials, equipment, specifications and models.
