Forward Mobile Columns

PRODUCTIVITY and PERFORMANCE FEATURES

WIRELESS OR WIRED COMMUNICATION

Easy to use design gives techs the option to control lift from any column. Make your repairs anywhere in your shop with the advantage of not being tied to a bay.

BATTERY OPERATED WITH INTERNAL CHARGER AND LIGHTED STATUS DISPLAY

Batteries purchased separately for international use

PROTECTED HYDRAULIC CYLINDER ROD

The hydraulic cylinder is inverted inside the carriage and the chrome piston rod is protected from debris and damage. This extends the life of the column and reduces maintenance frequency and cost

EASY TO MOVE ADJUSTABLE FORKS

Improves set up time without the need for reducer sleeves - adjustment range: 9" to 25"

TOUGH RUBBER-COATED STEEL WHEELS

Easily roll over dirt and debris that can jolt other lifts to a stop

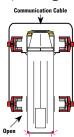

FORKLIFT POCKETS

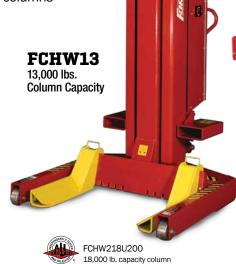

Provides a fast and convenient way to relocate columns

WIRED COLUMN CONFIGURATION INNOVATIVE HORSESHOE WIRING

While other mobile column lifts are connected by four cables, the wired FCH columns use just three (forming

a horseshoe), so the front or back of the lift is always open. Vehicles can be driven in and out of the bay without having to disconnect and reconnect cables.
