

ALB PICKUP & UTILITY BODY

The Anthony ALB (Anthony Load Blazer) is, hands-down, the industry's toughest pickup and service body liftgate. Its dual-cylinder direct drive system lifts with no cables, plus its grease free design means years of smooth operation with no required lubrication.

ALB features an exclusive stabilizer beam which reduces side-to-side platform motion and doubles as a driver step for easy access to the truck bed. For a pickup gate that's truly built for work, there's no substitute for an Anthony ALB.

LIGHT/MEDIUM DUTY

SIMPLY RELIABLE.

Spend more time trucking and less time maintaining your equipment.

Simple design is one of the best ways to maximize reliability. That's why Anthony liftgates are designed simple -- increased reliability and superior ease of service. In fact, many models can be serviced with nothing more than a few common hand tools.

KEY ADVANTAGES

- Stabilizer Beam Step
- Direct Hydraulic Drive
- Grease Free
- Recessed Control
- Platform Doubles as Tailgate

LA VAN & UTILITY BODY

The LA (Little Anthony) Series is a classic liftgate designed for use on service bodies and dry vans. It features direct hydraulic drive, a built-in step, standard tail lights, and a recessed toggle switch, plus all hydraulic components are housed safely within the liftgate body.

LA is a great fit for mobile service and roadside tire repair vehicles.
