

## ULTRAMAX® 1600-CCS Closed Circuit Crushing & Screening System

1600-69 CCS is our largest UltraMax® impactor—a mammoth in the industry—for producing your highest volume multiple spec product jobs.

### Features

- ① Includes the 1600-69 OC, side-discharge conveyor with vibrating pan feeder, 6x20 screening plant with an integrated feed conveyor, return conveyor with a cleated belt and three, radial-stacking conveyors.
- ② Hydraulic lift and leveling systems on the impactor and screen simplifies set up and tear down.
- ③ The electric control panels for the crusher and auxiliary equipment of the 1600-69 OC plant and 6x20 screening plant are free standing, enabling multiple location options.
- ④ Available in-line electro-magnet on the 1600-69 OC side-discharge conveyor.
- ⑤ Designed for all-electric power.
- ⑥ Includes 6x20 screening plant with integrated feed screen conveyor.
- ⑦ Includes return conveyor from screen plant to crusher hopper.
- ⑧ Features the industry's only LIFETIME ROTOR WARRANTY on its solid-steel, three-bar, sculptured rotor—the industry's heaviest—to keep you up and crushing.\*

\*North America only.

### Additional Features

- Replaces very large complex crusher and screening systems for a much lower initial investment and for greatly reduced maintenance, fuel and transportation costs.
- Produces three cubicle spec products simultaneously and returns the oversized product from the screening plant to the UltraMax® impactor plant for further reduction.
- Side-discharge conveyor is available in road-portable version.
- Features standard grizzly bypass chute and available cross-belt conveyor with flop gate to allow for either removal of the material that passes through the grizzly deck for stockpiling or blending back with the crushed material.
- Side-discharge conveyor has a vibrating pan feeder, receiving hopper with replaceable liners, available full-length skirtboards and optional in-line electro-magnet.
- Second 6x20 screening plant can be added for even higher production of cubicle spec products.
- Manage the feeder speed for complete control of the flow of material into the impactor with Variable Frequency Drive (VFD).
- Includes wireless remote control for the feeder shutdown and all motor stop.
