

STANDARD UNIT

The **Ditch Witch® JT5 Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system.

The Ditch Witch® JT5 Jet Trac® basic unit includes the following:

- Kubota D1105-E liquid-cooled diesel engine (24.8 hp gross, 23.8 hp estimated net @ 3,000 rpm) EPA Tier 4 compliant
- Electrical Strike System (module and barriers)
- Rack and pinion thrust drive
- Dual anchor system
- 150' capacity pipe box (less pipe)
- Rubber tracks
- Drilling fluid swivel
- Ship Kit Includes: Drill pipe wiper seal, copper thread compound with brush and tip cleaner set

JT5 STANDARD #1

JT5A Base Unit

Includes: Basic Assembly, Production Decal Kit, Ship Kit Pipe Accessories Includes Saver Sub

JT5 BASIC UNIT

JT5A Base Unit

Includes: Basic Assembly, Production Decal Kit, Ship Kit

PART NO. DESCRIPTION

TK RECON Guidance System

The TK RECON system is a guidance system for tracking horizontal directional bores. The system is comprised of a tracker, drill rig display and beacon. The TK RECON system provides many new and enhanced features and offers the choice of (3) trackers (a single frequency, a two frequency and a four frequency tracker), (2) displays (one display is mounted in-the-console and one display mounted remotely), and multiple beacon options including the 86, 15T, 17T, 19T and 88B series. The RECON ISM Telemetry Radio provides increased communication distance and speed, but The TK RECON system will not be backwards compatible with the existing TK series, so the current TK Series trackers and displays will continue to be offered, for those customers who have that need or preference.

Trackers detect one, two or four of the following beacon frequencies depending on the model: 1.5 kHz, 12 kHz, 20 kHz and 29 kHz frequency.

Displays communicate with trackers by telemetry radios. Telemetry radios are country specific in order to adhere to specific country regulations.

Beacons generate one of four frequencies depending on the model, frequencies include 1.5 kHz, 12 kHz, 20 kHz and 29 kHz. Beacons with more than one frequency communicates with the Tracker by Bluetooth[®] in order to configure frequency and power level.

TK RECON4

The tracker detects 1.5 kHz, 12 kHz, 20 kHz and 29 kHz beacon frequencies and may utilize an ISM telemetry radio to communicate to the rig display, the ISM radio frequency is country specific. See corresponding part numbers below. Each Tracker comes standard with an alkaline and Li-Ion battery trays, batteries, charger and operators manual. Selectable options include, the choice between Hard Case, carry bag or nothing and between large, small or no stand. Separately, select a corresponding, country specific TD RECON or TDR RECON display.

102-1608 TK RECON4, North America Radio

TK RECON2

The tracker detects 12 kHz and 29 kHz beacon frequencies and may utilize an ISM telemetry radio to communicate to the rig display, the ISM radio frequency is country specific. See corresponding part numbers below. Each Tracker comes standard with an alkaline and Li-Ion battery trays, batteries, charger and operators manual. Selectable options include, the choice between Hard Case, carry bag or nothing and between large, small or no stand. Separately, select a corresponding, country specific TD RECON or TDR RECON display.

102-1603 TK RECON2, North America Radio

PART NO. DESCRIPTION

TK RECON1

The tracker detects a single 29 kHz beacon frequency and may utilize an ISM telemetry radio to communicate to the rig display, the ISM radio frequency is country specific. See corresponding part numbers below. Each Tracker comes standard with an alkaline battery tray, alkaline batteries and operators manual. Selectable options include, the choice between Hard Case, carry bag or nothing, between large, small or no stand or add the option to include the Li-Ion battery, tray and charging system. Separately, select a corresponding, country specific TD RECON or TDR RECON display.

102-1595 TK RECON1, North America Radio

Commander™ 7 Display

The Commander[™] 7 is used exclusively with all models of TK Recon tracker and supported beacons. The system leverages the planning capabilities of the Field Scout[™] mobile through the built-in ScoutView[™] application. The system provides projected depth information and offers both Classic and Advanced Drill-To guidance modes. The display utilizes an ISM radio to communicate to the tracker, radio frequency is country specific. See corresponding part numbers below. The display has internal data storage capabilities and works with TMS Plus and TSR software. The system includes all necessary cabling and antenna, display assembly, dash assembly hard case and operators manual.

Integrated Display JT24 / JT40 CAN Bridge

The CAN Bridge INT, SV, is used with integrated displays available on current Ditch Witch JT/AT40 and JT24 machines and are used exclusively with all models of TK Recon tracker and supported beacons. This Can Bridge should be ordered with applicable machines upon order configuration however can be ordered separately utilizing the appropriate part numbers below.

220-6738 RECON CAN BRIDGE INT, SV, NORTH AMERICA

PART NO. DESCRIPTION

Commander™ 7 Dash Assemblies

The Commander[™] 7 Dash Assy, SV, is used with Commander[™] 7 Displays and are used exclusively with all models of TK Recon tracker and supported beacons. When purchased alone, the Commander[™] 7 Dash Assembly allows an existing Commander[™] 7 display to be shared with or moved to a second drill without having to remove any hard-mounted components from the first. This Commander[™] 7 Dash Assembly is included with Integrated Displays, however, can be ordered separately utilizing the appropriate part numbers below.

220-6758 COMMANDER 7 DASH ASSY, SV, NORTH AMERICA

PART NO. DESCRIPTION

TD RECON Display

The display is available as an in-dash mount (TD) or remote mount (TDR). Both styles of the display presents information displayed by the tracker at a distance up to 2000 ft (609.6 m) with the UHF radio. The display utilizes an ISM radio to communicate to the tracker, radio frequency is country specific. See corresponding part numbers below. The display has internal data storage capabilities and works with TMS Plus and TSR software. The TK RECON Display works with all models of TK RECON trackers. Each display comes standard with mounting hardware required to install on drill rigs.

102-1616 TD RECON, North America Radio approved countries are: Canada, Columbia, Mexico, Peru, United States, Venezuela

PART NO. DESCRIPTION

TK Recon Repeater

The TK Recon Repeater is used exclusively with all models of TK Recon tracker and displays. The system has a lightweight, compact design that is highly durable and is offered as a range extender and a tool to combat line of sight issues found on the HDD jobsite. The TK Recon Repeater leverages a simple to use, single button operation which features more than 50 hours of continuous battery life and the ability to mount to any ¼"-20 accessory.

102-1681 RECON REPEATER, NORTH AMERICA

TK/TD RECON Parts and Accessories

15T Beacon Transmitter

15T series beacons are available in a single 29 kHz frequency (15T1) or a three frequencies 12/20/29 kHz (15T3). They work with the TK or TK RECON tracker series. Prior to a bore, the 15T3 beacon can be configured with two of three frequencies 12 kHz, 20 kHz, and 29 kHz and can be configured with standard, high or extreme power. The 15T1 is 29 kHz and standard power level. The 15T series beacons are Grade pitch. The beacons are a universal length @ 15 in (381 mm) and an 1.25 in (31.7 mm) diameter, which fits into housings that are designed for a DCI transmitter. An optional 220-2356 hard case, batteries and isolators are available in the selectable parts section.

102-1632 15T1 Beacon, single 29 kHz frequency, standard power level

102-1588 15T3 Beacon, configurable 12, 20 or 29 kHz frequency; standard, high or extreme power levels

PART NO. DESCRIPTION

17T Beacon Transmitter

17T series beacon transmitters are available in multiple frequency and power options. They work with the TK or TK RECON tracker series. Prior to a bore, the 17T4 and 17T4G beacons can be configured with two of four frequencies 1.5 kHz, 12 kHz, 20 kHz, and 29 kHz. It can also be configured with standard, high or extreme power. The 17T1 is 29 kHz and standard power. The 17T1H is 29 kHz and high power. "G" designates Grade pitch, everything else is Standard Pitch. The beacon comes standard with flat-top/half-moon isolators for side-load housings. An optional 220-1090 hard case, batteries and other isolators are available in the selectable parts section. Length is 17.8 in (452 mm), diameter is 1.5 in (38 mm).

Trac Management System (TMS) Plus

Trac Management System (TMS) Plus is an integrated planning and mapping system for Horizontal Directional Drilling. The TMS Plus will work on any Jet Trac[®] equipped with the required Subsite[®] systems. Requirements for the TMS Plus include a TD / TDR Display, a TK / TKD / TKQ Tracker, 750 / 752 Display, a 750 / 752 Tracker and any Ditch Witch[®] pitch beacon. A computer capable of running Windows 95 or higher is needed. The TMS Plus Kit includes a cable to connect from the unit to the computer, a software disc, and a manual.

220-054 TMS PLUS CD ONLY OPTION220-1006 TMS Plus Dealer CD222-2335 USB DATA CABLE

PART NO. DESCRIPTION

DrillLok™ Remote/Base

DrillLok[™] is a remote disable feature that incorporates a "report" feature from the HDD unit back to a Handheld device. The report provides an indication to the tracking crew that the rig is disabled there by locking out any inadvertent motion of the drill string.
