4174355	Tool Holder (all models except 99170)	\$53.55	\$42.84			

### More Control For The BIG JOBS!

#### Debris Handling Made Easy!

Little Wonder blowers feature a unique discharge deflector that creates 2 adjustable air streams for a powerful and constant wall of air.

Top air stream prevents leaf and debris "blow-back".

Bottom air stream loosens up and moves stubborn debris and wet, heavy leaves.

Did you know Little Wonder Blowers feature a patented split-stream air deflector that literally splits the airstream to allow the user to direct airflow where needed depending on conditions?

Directing that airstream to the base of the pile to move the heavy wet leaves can cause the top layer to blow back over the cleared area. With the Patented Split airstream technology, a wall of air is created with the fastest air blowing the leaves at the bottom of the pile and the upper airstream controlling blowback!!!

Get the job done faster, with unmatched efficiency and durability.
