- ① Hoist potential body length range may not conform with I.C.C. bumper regulations or may not achieve maximum dump angle depending on truck chassis height. Shorter bodies available on some models with use of a shelf assembly or CVS system. Contact your SwapLoader distributor for more information.
- ② Maximum outside to outside long sill width.
- ③ Pump RPM and Flow are dependent on engine RPM and PTO ratio.
- ④ Polished nitrided cylinder rod.
- ⑤ Counterbalance valve manifold.
- ⑥ A lower GVW will limit your payload potential.
- ⑦ Optimum CA/CT dimension will be influenced by type of loads carried and turning radius requirements.
- ⑧ Clear frame dimension given is the overall length of hoist plus 5" for cab clearance and rear light bar mounting. Additional frame length may be necessary for other accessories such as cab guard, tarper, exhaust system, etc.
- ⑨ PTO/Pump rotation as determined by transmission.
