

Quick Response Transport Vehicle

AmbuBus QRT Frame

- The AmbuBus-QRT (Quick Response Transport) was designed for providing quick response on a smaller scale for customers who made need or have access to smaller vehicle platforms i.e. Mercedes Sprinter and Ford Transit. You can easily transport 3 litters in a non-ambulatory transport and still have room to monitor and administer needs to patients.

Ambustretcher- 3 total

- The AmbuStretcher is a durable stretcher for safe mass evacuation of non-ambulatory patients and casualties.

AmbuPillow - Total

- The AmbuPillow is a reusable pillow developed to maximize the patient's comfort while on a AmbuStretcher. The AmbuPillow ties directly to the AmbuStretcher and is easily adjustable for comfort. The AmbuPillow is made of foam encased by PVC coated polyester allowing safe cleaning and reusability while increasing shelf life.

AMBU BUS QRT

- The Ambu-QRT is designed for all four legs to be mounted to the vehicle while the cross arms can be folded down on themselves. This allows the vehicle to potentially be used for other means of transport and can quickly be transformed into a casualty transport vehicle. It also has been designed to carry up to 6 litters for in such cases as mortuary affairs.
