

Wood Flooring

Lumber is the most economical and affordable decking solution for end users, and provides a durable, yet easy-to-replace decking option, while still maintaining an entry-level price point. CM Truck Beds uses 2" pine wood flooring.

Blackwood Flooring

Blackwood decking uses an innovative rubber-infused lumber to provide improved durability, stain-resistance and traction, even in wet conditions. With the tactile surface of Blackwood, your cargo is less likely to shift in transit. The industrial-grade rubber used in Blackwood is the same material used at gun ranges to absorb bullets – so you know it's tough!

Rumber Wood Flooring

Rumber wood is environmentally friendly, stronger than other composites, and impervious to fluids, mud, oil and UV rays. Rumber boards will not crack, rot or split and they have a traction surface that increases safety. They can be cut with a saw, are easily installed, and are easy to clean.

3/16" Deck

CM's best-in-class 3/16" deck is a heavier duty deck that allows users to haul more weight. Providing higher weight capacity, this available option has the best quality results for your serious hauls.

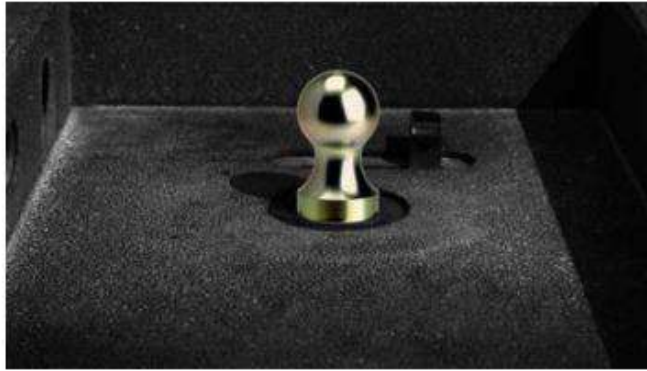

Cargo Light

This option provides truck bed lighting so users can see their tools and equipment on the deck. When your oilfield or construction job runs long into the night, trust in CM Truck Beds.

Bail Spike

Our CM Bail Spike allows users to haul bales of hay. This CM Truck Bed option is hydraulically operated and makes hauling hay simpler and quicker.

30,000lb B&W Turnover Ball

The CM Truck Bed 30,000 lb. B&W Turnover Ball option gives users a heavier weight rating and flexibility to haul 5th wheel. This option also allows users to switch back and forth from gooseneck to 5th wheel positions.

Front Underbody Toolbox

CM offers a durable, quality front underbody toolbox to help with all your hauling needs. This option offers a sense of storage and security when you're on the road with your CM Truck Bed.

Gooseneck Trough

CM's gooseneck trough allows users to easily back under a gooseneck without causing damage to their truck body.

Rolling Tailboard

This option offers CM Truck Bed customers lower rear deck height.

Drop In Side Rails

CM's drop-in side rails provide protection against damage from shifting cargo or equipment. With this option, your work truck will stay in better condition longer.

Rear Rub Rail

The CM Truck Bed rear rub rail option provides versatile tiedown points, allowing for safety and security of equipment while hauling.

Fold Down Side Rails

CM Truck Beds now offers fold down side rails on all units with rub-rail. This best-in-class option features tube construction with dual hinge attachment and a spring loaded latch located at the front gusset. These side rails come standard with (4) four adjustable airline track tie-downs complete with a bull ring rated at 5,000 lbs per track. Most impressively, this option can be offered at the time of manufacturing or as an easy bolt-on option to be installed at the distribution location. Once installed, our industry leading hinges have a removable pin, making this the most versatile removable side rail in the industry today. For more information contact your CM Truck Beds distributor.

Color Primer Only

CM's color primer option is a great way to keep your hauler body in good shape and in style. Our primer will prevent rust and corrosion developing on your truck body and give customers a peace of mind to travel off-road or on untreated roads.
