GLOBAL SOUNDGUARD

Global Pump SoundGuard™ enclosures are ideally suited for operations in residential and other areas where noise reduction is an important consideration.

Made of 12-gauge galvanized-steel (or optional stainless steel), double-sided galvanized sheet panels are insulated with a 1.00" thick acoustical foam barrier fire retardant composite to reduce noise level to no more than 68 dBa at 30' (9 m). Custom dBa levels are available to meet design requirements.

Designed for upward exhaust of combustion gases and cooling air. Panels are removable for maintenance and repair. Panel doors, with locks, provide easy access to the pump, engine, priming system and controls for routine servicing, lubrication and fueling.

FEATURES

Global Pump's SoundGuard pumps provide an economic, mechanically accessible, and dependable quiet pumping solution. Available in all model offerings.

Standard units reduce noise emissions to no more than 68 dBa at 30' (9 m)

Large, lockable doors provide easy access to the interior for operational controls, routine service and fueling

The entire enclosure, its individual panels and all doors are removable to allow complete access during maintenance or major overhauls

OPTIONS

DOT approved highway trailer with front and rear jacks, fenders and lights is an available option

Hose racks, accessory containers and other custom features are available options

Global Pump's innovative environmental box captures venturi blow by, separates and silences the air exhaust and returns liquid to the pump suction

DIMENSIONS

4GST / 4GHT (SAE Mount)	44" X 84.50"
4GST / 4GHT	44" X 110"
6GST / 6GHT / 8GST (SAE Mount)	56" X 112.50"

GLOBAL MESSENGER

The Global Messenger is an integrated remote telemetry hardware device that allows customers to collect and track multiple types of information about their Global Pump, including machine location, service usage hours and health and productivity information.

Designed specifically as an integrated telemetry and alarm notification system, the Global Messenger works seamlessly with electronic engine controllers, ECUs and other devices that support CANbus communications. The Global Messenger gathers data from a machine's on-board system and transmits it wirelessly to the network operations center, providing you critical information on your machinery in near real-time. As diagnostic messages are generated from the pump unit, the Global Messenger is capable of notifying these occurrences, right when they happen, with location, date and time.

By providing remote access to machine information owners can now manage their field equipment assets more effectively. The results are improved fuel efficiency, lower operating costs and a better return on investment.

FEATURES

Display J1939 fault codes/PGNs in plain text

Diagnose/troubleshoot engine or equipment problems

Compact, rugged, weatherproof design

Simple plug-and-play installation

Works with any brand diesel engine

Customizable

Affordable web based virtual real time monitoring and GPS tracking service

Supports serial communication

Optional embedded wireless telemetry

KEY HIGHLIGHTS

- Start, stop, & variable speed control with acknowledgment of the commands.
- Read and transmit customer flow meters, auxiliary fuel tank levels, pit levels, suction & discharge gauge reading, and engine functions.
- Customizable alarms to cell phone via text, e-mail, or phone call.
- Monitor auto operations of the machines.
- Generate reports on a scheduled basis.
- Track the equipment location and usage.
- Programmable auto-exercise of engine.

GLOBAL MESSENGER

TYPICAL CONDITIONS MONITORED

GPS Coordinates (location)

1 – General purpose on/off input

1 – Analog input

Standard values read via CANbus

Engine hours, RPM, Battery Voltage, Oil Pressure, Fuel Level, Oil Level, Oil Temperature, Coolant Level and Coolant Temperature

- All fault conditions reported by PGN 65226 (DM1 - Diagnostic Message)
- All fault conditions reported by PGN 60416 (TPCM used to report multiple diagnostic messages in a single CAN message)

Optional values read via CANbus

- Up to 8 User-specified PGN/FMI analog values
- Up to 32 User-specified PGN/FMI on/off values

FLASH memory for application – downloadable via serial port or via GSM connection – 512K

Low-low power SRAM – 512K – battery backed up

DIP switches to select

- Serial port function w Modbus Slave, Debug, None
- Serial port interface w RS232 or RS485 per port
- Modbus Slave ID w 126-133
- Port 2 baud rate w 4800-38400

Event logger accessible via serial port or via GSM connection

8 LEDs on-board indicate

- GSM status
- GPS status
- CAN status
- Serial port status
- Power
- 2 available for user-specified conditions

General purpose inputs

- 1 digital/1analog on 12-pin Deutsch connector
- 3 digital/1analog on 16-pin pluggable connector
- Digital inputs are contact closures to ground
- Analog input is 10-bit, 0-3VDC or 0-20ma or resistive input for fuel sender

Receive SMS messages for reconfiguration or on-demand reporting

MESSENGER BOARD SPECIFICATIONS

3.25" x 3.95"

- GSM/GPS board piggy-backs on top of Global Messenger board
- 4 mounting holes

CAN controller

- Supports protocol version 2.0 part A and B Active
- Bit rates up to 1.25M bit/second
- 32 independent PGN message objects

Port 1 – RS232 or RS485 – Modbus RTU Slave

Port 2 – RS232 or RS485 – Modbus RTU Master or Special

Battery Backed up Real-Time Clock, event log, data log, and more – 10 year life

SM-GPRS with SIM card holder embedded on Global Messenger

Certified with FCC, PTCRB and ATT for GSM/GPRS end-user applications

Extreme low power mode when engine is not running or other user-specified mechanism

32-bit processor

OEM CAPABILITIES

Virtual real-time transfer of monitored conditions

Local computations from monitored conditions

User-specified PGNs to be monitored

Event and data logging

Exception reporting to Internet-based applications

Tunneling into the Global Messenger or equipment attached to the Global Messenger via a wireless connection

SMS messaging sent on monitored conditions

Parameter setting via SMS messaging

PHYSICAL CHARACTERISTICS

Sleep Mode 12VDC @ 20mA

Monitoring Mode 12VDC @ 120mA

GPRS Transmit Mode 12VDC @ 800ma peak Temp.

Industrial Temp. Range -40 to +70C

NEMA 4X Enclosure 5.5"H x 5"W x 1.3"D, with mounting holes
