Included

Freight from Freeland, MI to Richmond, VA

Plus Applicable Sales Tax

Why Falcon?

It’s Versatile

- Recycle leftover asphalt, chunks and millings (a dual burner unit is required to recycle millings)
- Transport asphalt and keep it hot all day and hold it overnight
- Heat and re-heat cold patch

It’s Cost-Effective

- When used as a hot box, it eliminates asphalt waste that occurs in the back of an unheated truck bed
- When used as a recycler, it recycles leftover asphalt and asphalt chunks torn up from the pavement
- Independently certified 92% fuel efficiency – uses less than 3 gallons of fuel per 8-hour shift

It’s Reliable

- VIP Technology (patent pending) – Protects burner components by automatically preventing burner from operating with low battery voltage
- A Falcon is designed to allow the burner to run while in tow - preventing material from cooling while being transported
- Heat management system is engineered to provide even hopper temperatures – eliminating material scorching from hot spots and material hardening from cold spots
- Standard 2-year machine warranty and lifetime frame warranty

It’s a Falcon
