

Model 112

Two-Way Snow Plow

Small and light, this plow throws snow in either direction. It's ideal for getting into and clearing small, congested areas with ease. It features six 1/2" x 3" vertical ribs, 3 hinge points, and 60" outside hinge centers. The 112 is ideal for light/medium duty applications.

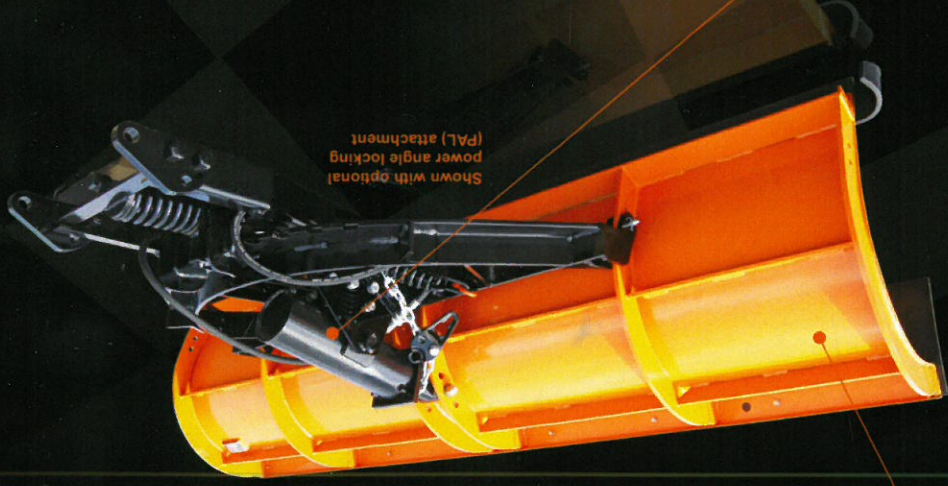

All Good Roads moldboards are constructed of HSLA A1011 Grade 50 10 ga. steel or better.

Model Number	112-930	112-936
Moldboard Length	9'	9'
Moldboard Height	30"	36"
Cutting Width (28')	7'11"	7'11"
Cutting Width (35')	7'5"	7'5"
Cutting Width (42')	6'10"	6'10"
Approximate Weight	775	870

Model 120M

Two-Way Snow Plow

Like the Model 112 but with a compound curve on top of the moldboard. More curvature provides more confinement of the snow until it's thrown off the side of the moldboard. The 120M features six 1/2" x 3" vertical ribs, 3 hinge points, and 60" outside hinge centers.

Shown with optional power angle locking (PAL) attachment

Model Number	112M-930	112M-936
Moldboard Length	9'	9'
Moldboard Height	30"	36"
Cutting Width (28')	7'11"	7'11"
Cutting Width (35')	7'5"	7'5"
Cutting Width (42')	6'10"	6'10"
Approximate Weight	840	930

Every Good Roads plow is equipped with a standard enclosed trip mechanism.

All plow models shown with various optional equipment. Weight listed does not include options.

Model 120

Two-Way Snow Plow

The 120 series plow is a wider, heavy duty alternative to the 112. It features eight 1/2" x 3" vertical ribs, 5 hinge points, and 116" outside hinge centers. The 120 is ideal for medium to heavy duty applications.

Shown with optional power angle non-locking (PAN) attachment

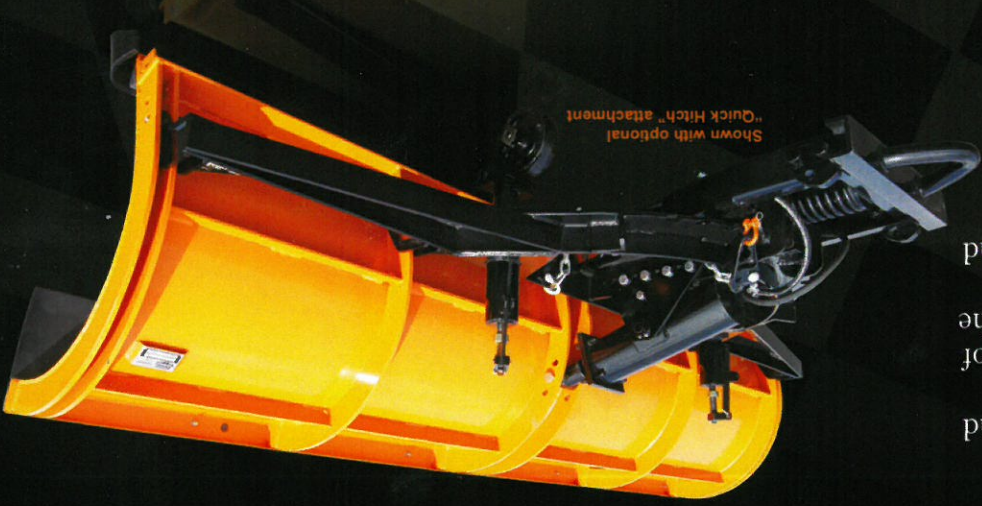

All plows and major components are Zinc Primed and Powder coated for a finish that is 700% more corrosive resistant than traditional paint and primer.
