# Premier Fuel Tanks for Every Need 

0ur tank systems are crafted with the finest U.S. materials, including 12- and 14-gauge high-yield U.S. aluminized steel (powder coated for a durable finish) or aluminum diamond plate.

## Replacement Fuel Tanks

Eliminate half your fuel stops by replacing the stock fuel tank with a high-capacity Transfer Flow replacement fuel tank system that doesn't sacrifice bed space or ground clearance.

## Refueling Tanks

Refuel vehicles and equipment with an in-bed transfer fuel tank. Department of Transportation (DOT) legal, our refueling tanks are engineered for gas, diesel, ethanol/methanol, and kerosene.

## Retrofit Filler Neck Kits

Whether for a pickup box delete, a utility body, or a cab chassis work truck, each filler neck kit is engineered for a specific vehicle to ensure a perfect fit and easy installation.

## Auxiliary Fuel Tanks

Extend your range with additional fuel in the bed of your truck. Our TRAX $4^{\text {TM }}$ computer-controlled auxiliary fuel tank systems automatically transfer fuel to the main tank.

Tool Box Tank Combos
For extra fuel and extra storage, we have auxiliary and refueling tool box combination systems. Each tool box fuel tank is equipped with a secure locking handle to keep your tools and gear safe.

## Accessories

For additional convenience, we offer a number of fuel tank accessories including locking fuel caps, diesel biocide, fuel filters, digital fuel meters, tie down brackets, and more.

## For Worry-free Fuel Transfers, You Can Trust Transfer Flow's TRAX $4^{m}$ Fuel Management System

The next generation of our auxiliary fuel tank operating system is here! TRAX $4^{m \mathrm{~m}}$ is our computer-controlled, fuel management system that transfers fuel from a Transfer Flow auxiliary fuel tank to your pickup's main fuel tank. TRAX $4^{\text {m }}$ comes with all our in-bed auxiliary fuel tanks, including our auxiliary tank and tool box combos.

Based on the capacity of your pickup's main fuel tank and the capacity of the Transfer Flow auxiliary fuel tank, the TRAX $4^{\text {m }}$ system will transfer fuel at predetermined levels while the vehicle is in operation.

Want to know the status of your on-board fuel systems? Simply download the TRAX $4^{\text {m }}$ mobile app to your smart phone and enter your vehicle and fuel system information. You'll be able to monitor your pickup's fuel capacity in no time! During fuel transfer, the message "PUMP ON" will be displayed on your smart phone. You also have the option of displaying either the gallons or the percentage of fuel in each tank.

## TRAX $4^{m}$ Status Guide

## ALL GOOD! The vehicle's fuel systems are functioning properly. <br> Fuel transfer from the auxiliary tank to the main tank is occurring. <br> ERROR <br> OPTIONAL ITEM <br> <br> Monitor the Fuel Level of <br> <br> Monitor the Fuel Level of Your Auxiliary Fuel Tank Your Auxiliary Fuel Tank with an In-Cab Display

 with an In-Cab Display}There is an error with the vehicle's fuel systems. See TRAX $4^{\text {m' }}$ manual.

Blue tooth connection has been lost.

Vehicle engine is off. Start engine to access data.
f you prefer not to use our TRAX $4^{m "}$ app with your auxiliary tank but still want to know how much fuel is in the auxiliary tank, consider our in-cab fuel level monitor LCD. The LCD shows the fuel level of the auxiliary tank with an easy-toread bar graph that decreases when fuel is transferred to the pickup's main fuel tank. This item is sold separately.

Fuel Level Monitor LCD (shown actual size) part no. 040-01-17100

## Gravity-Fed Systems are Unsafe and Unlawful

Due to safety, environmental, and legal concerns, Transfer Flow does not endorse, design, install, or sell gravity-fed fuel systems because of their inherent risks. With gravity-fed systems, if the valve, connectors, or fuel line malfunction (or you simply forget to close the valve), there's nothing to prevent over-filling the fuel tank and causing dangerous fuel spills. By installing a gravity-fed system, you are disabling the safety features of your vehicle's fuel system. Transfer Flow fuel tanks are never to be used in conjunction with gravity-fed systems.

## Long hauls are worryfree with additional onboard fuel!

Transfer Flow inbed auxiliary fuel tanks provide a worry-free, no-hassle experience with our patented TRAX $4^{m "}$ computercontrolled fuel management system.

Our AutoTrans ${ }^{\circledR}$
technology is specific for each vehicle and auxiliary tank model, and automatically transfers fuel from the in-bed tank to the main tank at specified fuel levels.

Our in-bed auxiliary fuel tanks are available in 37-, 40-, 50-, 75-, and 100-gallons. Each fuel tank comes with our TRAX $4^{\mathrm{m}}$ operating system and mobile app that shows fuel levels in percentages or gallons, as well as the operational status of the system.

## Each of our auxiliary fuel tanks come with our TRAX 4"'system and mobile app that shows fuel levels in percentages or gallons, as well as the operational status of the system.

## FEATURES \& BENEFITS

- Robot-welded seams provide extraordinary strength
- Comes complete with all components for installation
- TRAX $4^{\text {m" }}$ computer-controlled automatic fuel transfers for worry-free operation
- Built from ReliaSteel ${ }^{\circledR}$, high-yield U.S. aluminized steel, for superior durability and strength
- Baffled to prevent fuel sloshing
- 6-year, unlimited mile warranty

## NOTES

* 2010-12 Ram Mega Cab and Crew Cab short bed pickup with single rear wheels require a filler neck (part no. 050-01-15461).
© 2013-20 Ram Mega Cab and Crew Cab short bed pickups require a mounting bracket kit (part no. 020-01-16790).
+ This tank will not fit on 2013-18 Ram short bed pickups with 5th Wheel Prep Package.
- 2016-20 Chevy Colorado pickups require auxiliary vent line kit (part no. 020-01-16777).
* Does not fit on 2020 Ram short bed pickup.

## Trustpilot

# Fuel up equipment, vehicles, and off-road toys with a legal fuel station in the bed of your truck. 

Ditch the fuel cans when you have a refueling station in your truck bed that's perfect for refueling vehicles, off-road toys, and equipment.

Transfer Flow refueling tank systems are Department of Transportation (DOT) legal to carry and transfer gasoline, diesel, ethanol, methanol, and kerosene.

The easy-to-use hose purging feature pulls any remaining fuel left in the hose back into the refueling tank to eliminate fuel messes and stretch your extra fuel capacity even further.

## FEATURES \& BENEFITS

- Comes with 12 -volt GPI fuel pump, 12 ft . hose, nozzle, fuel cap, wiring harness with cab-mounted power switch, and mounting hardware
- DOT legal for gasoline, diesel, methanol, ethanol, and kerosene
- Built from 12-gauge ReliaSteel ${ }^{\circledR}$, high-yield U.S. aluminized steel, for superior durability and strength
- Powder coated black for durable satin finish
- Easy-to-use hose-purge feature eliminates messes
- Pumps up to 15 gallons per minute ( 8 GPM with 40-gallon refueling tank)
- Baffled to prevent fuel sloshing
- 6-year, unlimited mile warranty

# Enjoy the best of both worlds with extra fuel and extra storage! 

The all-in-one auxiliary fuel tank and tool box combos are computer-controlled by our TRAX $4^{\text {m" }}$ operating system for worry-free fuel transfers.

Easily load your tools, supplies, and equipment in the locking storage compartment to keep them safe, dry, and secure.

The 40- and 50-gallon fuel tank and tool box combos sit nearly flush with most pickup truck bed rails while the versatile 70-gallon model sits on the bed rails and adjusts to the depth of the pickup bed.

You can also add refueling capabilities to your Transfer Flow auxiliary fuel tank and tool box combo with the addition of our Refueling Kit!

## Each of our auxiliary fuel tanks

## Secure your gear and fuel in a refueling tank and tool box combo!

We've designed a refueling station with room to keep your supplies and gear secure. The tool box is equipped with locking handles and gas-filled shocks that make it easy to open and close.

The patented 70-gallon refueling tank and tool box combo pairs the popular over-the-rail tool box style with a versatile adjustable design that ensures the tank fits nicely with appropriate weight support.

Transfer Flow refueling tanks are Department of Transportation (DOT) legal to carry and transfer gasoline, diesel, methanol, ethanol, and kerosene, and features an easy-to-use purge function that moves remaining fuel in the hose back into the fuel tank.

## FEATURES \& BENEFITS

- Comes with 12 -volt GPI fuel pump, 12 ft . hose, nozzle, fuel cap, wiring harness with cab-mounted power switch, and mounting hardware
- Easy-to-use hose purge feature eliminates messes
- Pumps up to 8 gallons per minute
- Built from 12- and 14-gauge ReliaSteel ${ }^{\circledR}$, high-yield U.S. aluminized steel, for superior durability and strength
- Baffled to prevent fuel sloshing
- Gas-filled shocks for easy opening and closing
- Locking handles to keep gear secure
- 6-year, unlimited mile warranty

/ / Not only did I receive a better than expected fuel tank and tool box combo, but all and any of the parts needed to install and secure the tank were provided. Thank you again Transfer Flow. Keep up the great work! II

# Increase your fuel capacity without taking up bed space! 

0ur highcapacity replacement fuel tanks nearly double your fuel capacity so you can cruise without worry.

Each replacement fuel tank is made from 12-gauge ReliaSteel ${ }^{\circledR}$, high-yield U.S.
aluminized steel, and is designed to fit in the same space as the stock fuel tank. Simply remove the plastic stock fuel tank, replace it with our complete fuel system, and you're ready to hit the road.

Our replacement tanks are manufactured with internal baffles to reduce fuel sloshing, and come powder coated for a durable satin black finish.

## FEATURES \& BENEFITS

- Tank sits above the differential, no skid plate needed
- Fits in the same space as stock fuel tank
- Fuel tank mounts inside the frame rail
- Built from 12-gauge ReliaSteel ${ }^{\circledR}$, high-yield U.S. aluminized steel, for superior durability and strength
- Comes with straps and mounting hardware
- Powder coated for a durable satin black finish
- Baffled to prevent fuel sloshing
- 6-year, unlimited mile warranty

## NOTES

* F-150's equipped with a 26-gallon stock fuel tank require a replacement sending unit (part no. 070-SE-34254).
- F-150's with a $61 / 2 \mathrm{ft}$. bed require a Fuel Line Extension Kit (part no. 020-01-17011).
- Only fits long bed SuperCabs equipped with a 34-gallon stock tank.
- On 2004 model years, this fuel tank system is only available for GM pickups with an LLY engine. Your pickup has an LLY engine if " 2 " is the eighth digit of the pickup's VIN number.
$\boldsymbol{x}$ This fuel tank is not for sale within California.
- For 2016-20 model years, this tank will only fit Tundras originally equipped with a 26 -gallon stock tank.

# Take your work truck further with a durable replacement fuel tank! 

whether you use your vehicle for towing, hauling, or everyday use, replacing your smaller OEM fuel tank with a high-capacity replacement fuel tank system for more onboard capacity and driving range is a must.

Manufactured from 12-gauge ReliaSteel ${ }^{\circledR}$, high-yield U.S. aluminized steel, our replacement fuel tanks are fitted with internal baffles to reduce fuel sloshing and come powder coated for a durable satin black finish. New straps and mounting hardware is included.

Larger replacement fuel tanks are available for Ford and Ram cab chassis with $60^{\prime \prime}, 84^{\prime \prime}, 108^{\prime \prime}$, and $120^{\prime \prime}$ Cab-to-Axle (CA) measurements.

## FEATURES \& BENEFITS

- Available for 60", 84", 108", and 120" CA measurements
- Fuel tank mounts inside the frame rail
- Tank sits above the differential, no skid plate needed
- Built from 12-gauge ReliaSteel ${ }^{\circledR}$, high-yield U.S. aluminized steel, for superior durability and strength
- Comes with straps and mounting hardware
- Powder coated for a durable satin black finish
- Baffled to prevent fuel sloshing
- 6-year, unlimited mile warranty

## NOTES

- When replacing the aft axle fuel tank with a Transfer Flow midship fuel tank on a Ram cab chassis, an aft axle extension kit is required (part no. 020-01-13920).
* The DEF tank lines will need to be relocated when installing this fuel tank.
- The tank will fit all 60 " CA standard cabs with manual shifter and $2 \times 4$ with electronic shifter.
