AND LOW MAINTENANCE.**

NOW CONNECTED 
HI CONNECT

Take your business to the next level with HiConnect

Keep your fleet one step ahead with next-generation intelligence. Customers can now utilize real time data and notifications to improve safety, reduce downtime and increase productivity throughout their fleet. Connectivity comes as a standard feature with one year of access already included.

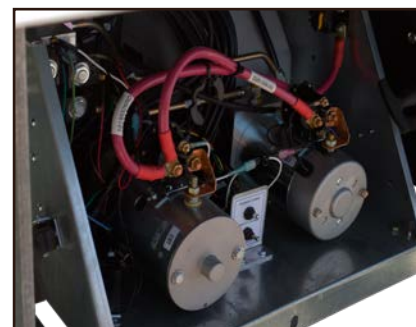

STANDARD WDV SERIES ADVANTAGES INCLUDE:

- Lifetime Warranty on 2nd Generation UHMW Slide Pads.
- Power Down with Hydraulic Power Open and Close.
- Platform Warning Lights.
- Mechanical Transit Lock and Bottom Stops for dock loading.
- Galvanized Mainframe and Aluminium Platform.
- Power Unit preinstalled and tested in Galvanized Pump and Battery Boxes with premounted hanger brackets (Battery box is optional on straight trucks).
- Pre-mounted Marine Potted Toggle Switches.
- Backup Power Unit and Switch on 5,500 lb. and 6,600 lb. models.
- Series Hydraulic Circuit Design and Automatic Self-Leveling System:
 - Load can be offset without compromising capacity.
 - Platform always lifts parallel to truck bed, even on uneven road surfaces.
 - Fully lubricated cylinders reduce seal wear and closed hydraulic system keeps out fluid contaminants.

The WDV offers extra advantages for your delivery solution.

Platform Warning Lights are standard on all WDV GEN II models to provide added safety and security. The lights automatically flash when the liftgate is in operation.

Dual Pump and Motor on 5,500 lb. and 6,600 lb. models with simple toggle to backup. STD Feature.

WDV SERIES HEAVY DUTY GATE

Fixed UHMW Heavy Duty Bumper:
Creates a larger impact area for varying docks, as well as absorbs more energy and transfers the load back into the trailer or truck body frame.

UHMW Floating Slide Pads:
Lifetime Warranty eliminates the cost of replacing rollers and downtime. New, free floating design means no hardware and faster replacement.

Pre-Mounted Marine Potted Toggle Switch:
Protected against elements, pre-installed in a location that allows easy viewing of the platform work area.
