

## Bottom-Trip Carbide Cutting Edges (Optional Equipment)

Heavy-duty, carbide-tip cutting edges significantly extend cutting edge life and deliver superior scraping performance. Meyer moldboards and cutting edges are pre-drilled and ready for installation. Cutting edges are sold as complete kits or separately as required.

Note: Cut Edge Only #84154 requires (2) for a complete set.

## Bottom-Trip Polyurethane Cutting Edge Kit

Today's pros are faced with many requirements and stipulations from their customers. Polyurethane cutting edges provide the rigidity of steel edges, and the noise reduction of rubber edges, all while protecting sensitive surfaces. Our one-inch-thick edge is formulated for long life. Bottom-trip cutting edges are also reversible to extend the life, once a side is worn, simply reverse the cutting edge for extended use. Meyer moldboards and cutting edges are pre-drilled and ready for installation. Cutting edges are sold as complete kits or separately as required.

Note: Complete Kits come with all hardware in order to install.

# DEFLECTORS

[Back to top](#)

## Meyer Heavy-Duty Deflectors

Made of rigid polyethylene, Meyer Heavy-Duty Deflectors reduce blow-back on the windshield and accentuates the snow-rolling action. The 45-degree angle end-cut helps throw snow more precisely and quicker for a cleaner scrape. Meyer moldboards are pre-drilled and ready for deflector installation. Deflectors and complete kits come ready-to-install with hardware bag and steel mounting belt. Components also sold separately as required.

Note: Complete Kits come with all hardware in order to install.
