

Plow Cart

Moving and/or maneuvering a fully assembled plow can be a difficult task! However, with the Meyer EZ-Cart, moving a plow is EASY. Plow carts are highly mobile custom cradles that allow anyone to move an unattached plow quickly and easily. Now, move your plow around as easily as your gas grill with the Meyer Plow cart. Choose the correct cart for your specific plow. Plow carts come as one (1) unit and come with all hardware and instructions for an easily installation.

The Meyer logo is displayed in a yellow square with a black border. The word "Meyer" is written in a bold, black, sans-serif font.

Bottom-Trip Polyurethane Cutting Edge Kit

Today's pros are faced with many requirements and stipulations from their customers. Polyurethane cutting edges provide the rigidity of steel edges, and the noise reduction of rubber edges, all while protecting sensitive surfaces. Our one-inch-thick edge is formulated for long life. Bottom-trip cutting edges are also reversible to extend the life, once a side is worn, simply reverse the cutting edge for extended use. Meyer moldboards and cutting edges are pre-drilled and ready for installation. Cutting edges are sold as complete kits or separately as required.

Note: Complete Kits come with all hardware in order to install.

Bottom-Trip Rubber Cutting Edge Kit

Today's street and road managers are faced with low-noise requirements and a variety of delicate surfaces. Meyer rubber cutting edges are designed to eliminate noise while providing maximum protection to the surface. Our 1.5-inch-thick edge is formulated for long life. All Meyer rubber cutting edges are also reversible to extend cutting edge life. Once a side is worn, simply reverse it for extended use. Meyer moldboards and cutting edges are pre-drilled and ready for installation. Cutting edges are sold as complete kits or separately as required.

Note: Complete Kits come with all hardware in order to install.

Meyer Rubber Snow Deflectors

Made of pliable rubber, deflectors keep snow flume down and away from the windshield and accentuate the snow rolling action. Meyer moldboards are pre-drilled and ready for deflector installation. Deflector complete kits come ready-to-install with hardware bag and steel mounting belt. Components also sold separately as required.

Note: Complete Kits come with all hardware in order to install.

Super-V Center Cutting Edge Kit

The optional Super-V Center Cutting Edge Kits are a direct replacement of the standard equipment rubber center section edge. The optional kits are available in steel or urethane. These center cutting edge aftermarket kits provide added protection to the plow's cutting edges and improve clearing performance to eliminate snow trails or striping. Urethane kits are typically used when working on sensitive surfaces. Both kits fit on all Meyer Super-V plows. Cutting edge kits come as a pair (2) and ship with mounting hardware.

Bottom-Trip Steel Cutting Edge (Standard Equipment)

Meyer steel bottom-trip cutting edges are scientifically designed to meet the demands of a tough environment. Our unique, heat-treated specifications are derived from years of testing to provide long-lasting performance. All Meyer cutting edges are also reversible to extend life. Once a side is worn, simply reverse the cutting edge for extended use. Meyer moldboards and cutting edges are pre-drilled and ready for installation. Cutting edges are sold as complete kits or separately as required.

Note: Complete Kits come with all hardware in order to install.
