INNOVATION BY DESIGN

TC-300 Series Combination Service/Dump Body

A Unique “No Compromise” Design

TruckCraft has the answer for users who need one truck to do a combination of many jobs. The TC-300 series carries large payloads and provides secure space for all your tools and equipment too! Built to be the #1 body for contractors, municipalities, utilities, landscapers and nurseries.

Innovation and Quality

TruckCraft has engineered the body and subframe to handle greater hauling and storage loads. No need to be concerned about bending your truck frame, the “No Compromise” design offers you the greatest capacity on trucks of 10,000# G.V.W. and up, in the industry. The TC-300 series has dump body capacities of 2.75 or 3.0 cu. yds., storage capacities of 57 or 64 cu. ft. of space, and handles 4' x 8' sheets with the tailgate closed. The entire side pack set is built of treated steel for years of rust resistant life. The dump body's electro-hydraulic powered 3-stage telescopic hoist uses efficient hydraulic principles for a fast, 25 second raise time. The cylinder operation is smooth and effortless, and allows the bed to be mounted 8-10" lower than a comparable scissors hoist. A one-hand tailgate unlatch lever, low floor height, built in hand-hold and step bumper all combine to make worker entry to the dump body fast and easy.

Maximum utilization of space

TC 300 Capacity

SPECIFICATIONS

Dump Body	TC-300 (9')	TC-310 (8')
Capacity*	12,000 lb.	12,000 lb.
Volume*	3.0 Cu. Yd.	2.75 Cu. Yd.
Cargo Area	48.5" x 108.5"	48.5" x 96.5"
Floor	One piece	One piece
Steel	A60 GALV.	A60 GALV.
Dump Angle	49 Degrees	49 Degrees
Hoist	3 Stage	3 Stage
Storage Compartments		
Volume	64 Cu. Ft.	57 Cu. Ft.
Size (Nominal)	9' x 20" x 36"	8' x 20" x 36"

***NOTE:** Your truck, dumper & payload should not exceed the G.V.W. rating or axle rating usually found on the inside of the doorframe on the driver's side.

features that let your truck work harder

A super duty 18" double acting tailgate is hinged top and bottom for controlled spreading or complete clean dumping. The lever handle allows single-handed operation.

The TC-300 Series Hoist is a 6 ton, 3-stage telescopic type, powered by an electrohydraulic pump that can be used with automatic transmissions.

TC-300 Service Dumper

5751 Molly Pitcher Hwy S.
Chambersburg, PA 17202

FAX 717-375-2975 • 717-375-2900

The dump body protects the truck cab, rear window and storage compartments. A roll-up nylon-reinforced lumite tarp that covers the entire load is available for TC-300 series bodies.

General Information

Lubrication fittings are provided at all critical points. The dumper floor is a one piece design and all seams are continuous welded. The body safety prop is controlled with a handle from outboard of the body. A load limiting valve prevents operator from lifting overloads. Standard 18" rear corners with slots allow the addition of side boards for hauling of bulky loads. A back-up alarm and pintle hook provision is included. Body and hoist are factory assembled, except side packs, which are fitted and then removed for shipping—saves you money at mounting time.

Electric-Powered Tailgate Spreader Available

- Replaces tailgate with all aluminum and stainless unit
- Connects to truck battery (Hvy duty alternator req'd)
- Quick installation and removal
- Highly reliable sealed motors
- Near "0" maintenance and operational costs
