

## LubeMate® Open Lube Trailers

**Keep a preventive maintenance schedule with an affordable alternative to a lube truck.** A remote fluid recovery system allows a drain pan to be placed under equipment and used oil to be pumped into the holding tank. Tanks are independently mounted with vibration dampening springs and pads, while each tank is equipped with a 3:1 or 5:1 pump, hose reel as standard equipment. Features include electric start air compressor with Honda or Kohler engine and a tandem axle with hydraulic or electric brakes and all necessary wiring. All reels and equipment are out of the weather and secure. (Any tank configuration or size can be made)
