- Power Down
- Galvanized Finish

Loadable Platform Space with Cart Stops Deployed

Distributed by

Large Wedge-Type Platform Design

The TE-20 features large (36"/40"x 80") wedge-type platforms that are available in Steel or Aluminum configurations. The wedge design allows for the smooth transition of load on and off the platform.

Single- or Dual Cart Stop Options

The Aluminum platforms feature optional single or dual cart stops.

Optional Bolt-On Steps and Extension Plate

The steps and extension plates were strategically designed to bolt-on (option) in order to avoid welding on the gate that would affect the factory paint or galvanized finish. The steps were also designed as an integral part of the gate that would easily allow for them to be exchanged in case of dock damage.

Grease Fittings Standard

The TE-20 features grease fittings at all critical rotation points.

MAXPRO
MAXIMUM PROTECTION PAINT

MAXPRO® Paint or GALVANIZED Finish

This patented, Maxon exclusive paint process has a tough polyurea top coat and an AL rich primer that combat corrosion and keep the liftgate looking like new for many years. For even more corrosion protection, the TE-20 is also available in a galvanized finish.
