RAILGATE SERIES - HIGH-CYCLE MODELS WITH FIXED PLATFORMS

2500 & 3000 LBS CAPACITY

HIGH-CYCLE RAILGATE MODELS

High-cycle models apply a steel roller and leaf-chain pulley system to maximize smoothness of motion, endurance, and strength. This medium-duty railgate is ideal for high-cycle applications in any environment. These lifts are built with the highest quality components and place a priority on function and safety.

89-30 EA55

High-cycle railgates come standard with safety trip bar, auto open and close, and recessed lights. Taper-integrated cart stops are optional on extruded-aluminum platform models.

ROLLERS

Steel rollers guide the platform vertically within the rail track and are designed to withstand intensive cycling. Dual-sealed, maintenance-free ball bearings ensure the rollers are long-lasting and perform consistently in all climate conditions.
