

1540 REAR BLADE

Rhino has been manufacturing the leading line of tractor mounted blades for over 50 years. A Rhino blade means rugged durability, superior craftsmanship, innovative design and outstanding performance. Whether you need to dig a ditch, repair a terrace, maintain a road, remove snow, clean a feed lot or prepare a level surface, there is a Rhino Blade for you.

Features include heavy-duty, three-point hitches, reinforced mainframes, massive solid steel kingpins, precisely-formed moldboards, tilt adjustments for rugged durability and outstanding performance. The 1540 Blade is available with either manual or hydraulic adjustments to help fit a wide range of applications and needs.

Perfect For: Ditch Work | Terrace Building/Maintenance | Building/Maintaining Roads | Snow Removal | Clean Livestock Lots
