# DEUCE E-TIPPER

The **Deuce E-Tipper** from Crysteel combines rear and side dumping capability in one body for increased productivity. Dump to the rear for typical applications and use the side dump feature for hard to reach places in tight jobsites and for easy spreading of material.

Dumping direction is easily controlled with one lever and Crysteel's standard tailgate release controls both the rear and side release. Standard features include: Quick-drop tailgate, dump-thru driver's side gate, fold-down passenger side. The Deuce E-Tipper is

also available in stainless steel for extra strength and corrosion protection from harsh environments and corrosive materials. The exclusive Lo-Boy® hoist is only available with the Deuce and cannot be purchased separately.

- 10 ga. steel ends and 7 ga. steel floor
- 12 ga. fold down passenger side
- 7 ga. dump thru driver's side
- 55° side dump angle
