PARADOX™ SERIES DUMP BODIES

Lightweight, Super High-Strength Steel Construction

ParadoxBox™ square dump bodies are constructed of lightweight, high-strength steel, resulting in bodies that are considerably lighter than traditional steel bodies. This means more payload dollars every time you load the truck.

For the real tough loads, the **Paradox RoxBox™** is ready for whatever you can dish out, including heavy-duty construction, demolition, and quarry applications. The Paradox RoxBox utilizes higher strength steels to make it one of the most durable bodies in the industry.
