

# AR RAILTRAC®

AR (Anthony RailTrac®) is a classic medium rail liftgate, with spring- assisted platform operation and an extensive list of available configurations.

Its durable roller chain drive allows all hydraulic components to be guarded safely within the liftgate housing. Lift cycle friction is minimized by advanced anti-wear pads which eliminate the need to lubricate or replace rollers, common in competitive models. Plus, AR offers a huge variety of steel and aluminum platforms, and three corrosion resistance finishes, including stainless steel.

## RECOMMENDED APPLICATIONS

LIGHT/MEDIUM DUTY

## MARINE DUTY CONTROLS

Inside every Anthony toggle control is a premium-quality, IP-67 rated, stainless steel switch. Its terminals are fully encased in a thick epoxy coating which guards against dust, moisture intrusion, and loose electrical connections that can lead to unwelcome downtime.

## KEY ADVANTAGES

- Spring-Assist Open/Close
- Grease Free
- Low Pressure Hydraulics
- Highly Customizable

AR-1800 with aluminum platform and optional stainless finish

**2** YEAR WARRANTY

### STANDARD MODELS
