2000SR

PULL-STYLE TARP SYSTEM

D003FL-0819

STANDARD FEATURES

- Tarp Spool with Side Plates
- Adjustable Width Steel Housing (P/N 1800047)
- Aluminum Pull Bar
- Armless Spring Return
- Adjustable-Width Roller Bar
- External Spring Tension Adjustment
- Expands 84-100° to Fit Your Truck Right Off the Shelf

FITS YOUR TRUCK RIGHT OFF THE SHELF

The ideal choice for dump trucks and trailers, roll-offs and other open-topped containers. One size fits all and there are no pivot arms or external springs to damage, so installation is fast and easy – less than two hours from start to finish.

The 2000SR uses a spring return roller bar to retract the tarp automatically. The 2000SR can be ordered with or without the expandable tarp housing. The telescoping aluminum roller bar means that no assembly is required; simply extend it to the proper width before installing. Sealed bearing construction includes a 3/4-inch center support shaft for durable heavy-duty operation. The roller spring is backed by a lifetime warranty, and an external tensioner lets you make adjustments without removing the tarp. Available options are adjustable-width steel housing, wind deflectors and a tarp trap hold-down kit.

FITS BOXES & TRAILERS - UP TO 23'

Complete system part numbers with options.

PART NO.	KIT NAME	FEATURES
1800047	2000SR	Adjustable-Width Steel Housing
1800502	2000SR-No Housing	Housing NOT Included

Short Installation Time

The 2000SR pull tarps can be installed out of the box in as little as one hour. A short install time allows the operator to get back to work and increases productivity.

Automatic Tarp Return

The roller bar is spring loaded, keeping constant tension on the tarp and allowing for an easy, smooth roll back to the open position. The spring-loaded roller is backed by a lifetime full warranty.
