

Software – Public Safety

CAD (Computer Aided Dispatch)

Southern Software's CAD Software is a tool that allows telecommunicators to efficiently obtain the information to respond to Calls for Service (CFS) in a pre-planned, uniform system for multiple agencies and disciplines. It gives users an organized method of assigning and tracking a large number of response units and serves as a common hub to interface with other software functions. Full Integration with Southern Software Products including RMS for query and report creation, MDS map viewer and MDIS mobile.

- Comprehensive reporting and data search capability
- Creates an audit trail of actions taken in handling an emergency Call for Service (CFS)
- Integrated with APCO-Intellicomm, CACH, ProQA, or SmartHorizons for EMS, Fire and Police classification and pre-arrival instructions
- Mouse or command-line operation for major operations
- Interfaces with Southern Software Records Management system for query and report creation
- Multi-Geo lookup control searches address, MSAG, intersection, and landmark records at once to help you choose geo-verified information
- Interfaces with Southern Software MDS map viewer, MDIS Mobile and other selected third party vendors
- Multi-jurisdictional and multi-discipline
- Single or dual screen functionality
- Pre-planned event notifications
- Department/unit recommendations
- Automatic call guide/instructions display
- E-911 interface

*Includes 1 Full Position of CAD, Data Evaluation, Project Management Fee (1 Session of Training)
and 1 Year of Support*
