# VIDEO CONFERENCING MADE EASY

## ViewSonic certified solutions for Teams Rooms

As companies continue to find the right balance between remote, on-site and hybrid work, **video conferencing remains a vital piece to keeping teams connected and productive.** Enabling your employees to collaborate from any location should be as easy as a knock on the next cubicle, even if that knock is through a speakerphone and webcam.

Luckily, ViewSonic® video conferencing solutions are Microsoft Teams Rooms certified. Combining our 35 years of display technology expertise with products from our friends at Logitech, these solutions deliver high-quality video and audio so that your teams can communicate clearly and easily. **With our lineup of commercial displays, Direct View LED displays and ViewBoard® interactive displays, you can create meeting spaces of any size that encourage inclusivity, enhance collaboration and drive productivity.**

## Huddle Spaces

For smaller rooms and quick meetings, our 65" to 75" ViewBoard® displays and a Logitech Meetup camera can be mounted on a mobile cart for instant setup and easy room-to-room mobility. Roll this entire Teams Rooms certified solution to any huddle space and never miss a meeting start time.

## Meeting Rooms

Medium-sized meeting spaces require wide cameras, powerful speakers, and noise-canceling microphones. A ViewBoard interactive display, or one of our CDE series of large format displays, can combine with a Logitech Rally Bar to ensure that everyone in the room can be seen and heard.

OR

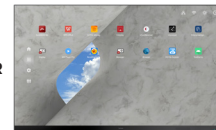

## Boardrooms and Conference Rooms

For larger spaces, our 86" ViewBoard interactive displays or our 135" Direct View LED display are ideal for delivering high-impact messaging to a large audience. Combine these big-screen displays with a Logitech 4K Rally Plus camera, and communication will be crystal clear for all.
