Getac

Video Solutions

ZeroDark™ HD Camera

You work at night and so does the ZeroDark HD camera. Using a sensor designed to far surpass existing products in both quality and low-light video recording, ZeroDark excels at recording the details you need—even in darkness. The new smaller size and the ability to combine two cameras for a complete 180° view ensures you don't miss a thing.

Powerful DVR

Powerful and compact, our DVR captures video from multiple cameras and comes standard with the critical features you rely on such as on-board crash sensor, built-in battery backup, Wi-Fi, GPS and an intelligent power supply to prevent battery drain on the vehicle.

Body-Worn Camera

The Body-Worn Camera delivers panoramic, full HD video, even in low-light conditions. With one of the smallest and lightest designs in the industry, more than 12 hours of full-shift battery life and a wide range of communication features, it can go wherever the action is, providing complete situational awareness in critical scenarios.

Rugged & Fault Tolerant

Capturing the video data you need even under the most extreme conditions is necessary and can't be interrupted. You need a system that is as rugged as your team is, even when your vehicle or its power system becomes damaged. The Getac Video Solutions devices are rated Extremely Rugged and IP67 compliant.

Software Command & Control

Getac Enterprise software is one of the most powerful back-end video management tools in the industry. The highly scalable software provides dashboard overview, media management and remote management of all your systems.

Manage Data Effectively

With Getac Cloud, you can securely manage the digital assets obtained from in-car cameras, body-worn cameras, interview rooms and other digital devices. Any digital video, image or document may be securely uploaded, browsed, viewed, classified and shared using only a web browser.
