

ANALYTICS – STATISTICAL REPORTING TOOL

BRIEF DESCRIPTION AND CAPABILITIES

Analytics

Analytics is our statistical reporting tool which incorporates a suite of software applications used to analyze supervised individuals GPS location data in minutes. Our Analytics software is currently in use by State and Local Police, Federal Police, Intelligence Organizations and Militaries in the Western world. In addition to a broad user base, Track Group's Analytics is also in the current Surveillance Training curriculum at the US DHS Federal Law Enforcement Training Center (FLETC).

Analytics provides a visual summary of all locations visited on up to a month's worth of location data and helps Supervising Officers investigate potentially concerning locations visited by frequency, duration, date, and time. Authorized users have the capability to view supervised individuals' locations data where they can easily disseminate travel and stop patterns enabling supervising officers to quickly visualize "pattern of life" and address concerning behavioral trends.

Discounted Catalog Daily Rate Pricing for Analytics includes: Authorized users have 24/7/365 (including holidays) remote access to Analytics software application. Initial, ongoing and refresher training for Agency staff. Live 24/7/365 Monitoring Center Services. Toll-free number for direct access to 24/7/365 live Customer Support Services. **Since Analytics software application is accessed over a secure link via SSL on HTTPS, Shipping & Handling is not applicable. *Pricing is per user, per day.*
