BACtrack – REMOTE BREATH ALCOHOL MONITORING BRIEF DESCRIPTION AND CAPABILITIES

BACtrack is an innovative solution that integrates a smartphone app and police-grade breathalyzer (with fuel cell technology) to bring blood-alcohol content (BAC) testing wirelessly to smartphones. Featuring Bluetooth connectivity, BACtrack tests for ingested alcohol in the human body by a deep lung breath sample and accurately calculates BAC levels with results showing 0.000% – 0.500%.

The device is FCC compliant, shock-resistant and has an internal, rechargeable battery that is rated to last over 7+ days on a single charge.

Authorized Agency users can swiftly and easily create customized test schedules along with the number of tests required to be taken per day, random tests – where the platform will send spontaneous test requests or request on-demand test. Test results are immediately transmitted to our central host system, providing supervised

individual's Breath Alcohol Content (BAC), photo (color), video, GPS location, and date and time of when test was performed.

Discounted Catalog Daily Lease Rate pricing for BACtrack includes: BACtrack device, mouthpiece, and charging cord. Instant alert notifications via email and/or text. Live 24/7/365 Monitoring Center Services. Toll-free number for direct access to 24/7/365 live Customer Support Services. Authorized users have remote access to monitoring software (24/7/365). Initial, ongoing and refresher training for Agency staff. Full warranty coverage on routine maintenance and standard repairs and shipping & handling of BACtrack device(s) and accessories. **Pricing is per device, per day.*
