

Remote Breath Pro is ideal for:

- Lower-risk clients
- Pretrial and probation
- Community corrections
- Domestic violence and family court cases

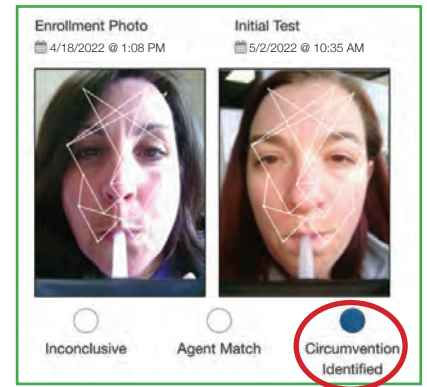

Portable and durable alcohol testing built for community corrections.

SCRAM Remote Breath[®] Pro provides portable breath alcohol monitoring to ensure clients comply with court orders. The easy-to-use device is ideal for low-risk clients or those who have earned less intensive testing and monitoring.

Enhanced Facial Guidance and Authentication Software

- Provides visual cues ensuring face is aligned during client testing
- Increases client compliance by reducing the need for multiple tests
- Decreases officer photo manual matching by 90-95%

Portable and Discreet

This small and durable device adapts to clients' everyday life—enabling them to take tests anytime, anywhere. Includes a fitted carrying case and both standard wall outlet and USB charging ability.

Additional key features:

- GPS location with taken **and** missed tests
- Immediate notification of BrAC and client verification results
- Configurable scheduled and random testing schedules and testing grace periods
- Stores up to 40,000 test results when not in cell service and forwards upon return
- Optional testing reminders via text message

TRANSDERMAL ALCOHOL MONITORING

SCRAMx is the only scientifically proven and court-validated continuous transdermal alcohol monitoring device available. Technologies such as SCRAMx have taken center stage as a way to greatly enhance participant supervision and accountability at a fraction of the cost of incarceration.

SCRAMx provides flexible options for the type and intensity of supervision while enabling participants to maintain a job and meet family obligations. SCRAMx is the only continuous alcohol monitoring product that does not require a secondary test to confirm a drinking event by a participant.

Bracelet

Base Station

ESSENTIAL FEATURES

- Testing gaps are eliminated as participant cannot miss a test
- Automatically tests for the presence of alcohol every 30 minutes, 24 hours a day
- Used by 100,000+ offenders across the US
- Works well in conjunction with treatment to enforce compliance and better identify when intervention may be needed
- Multiple sensors offer best-in-class tamper detection, placement of obstructions, and attempts to remove the device
- Flexible monitoring levels for multiple needs
- Optional RF in-home monitoring station
- RF base station communicates with monitoring center via landline, cellular, or ethernet
