

Contraband Separation

ECLIPSE – COVERT UNIT FOR DISCRETE COLLECTION OF CONTRABAND

Body scanners in correctional environments to find contraband internally has significantly increased the number of dry cell situations. Now there is a safe and humane solution that eliminates current dry cell protocol for clean and safe contraband retrieval.

- ✓ **Discrete:** All of the capture is done in different space so there is no awareness of collection from inmate.
- ✓ **Captures Contraband:** These units are designed to capture, wash and sterilize drugs found and **assist in the safe and hygienic recovery of contraband.** from the feces of detainees, while offering the maximum amount of protection from contamination while also maintaining the chain of continuity of evidence.
- ✓ **Zero Contact Solution:** The recovered packages are in full view throughout the cleaning, sterilizing and recovery sequence. The packages are recovered through an outlet port within the equipment. **The operator has no direct physical contact with hazardous materials.**
- ✓ **Reliable:** All units are built in the **USA** and covered by a 12-month Warranty

Use to Recover:

- ✓ **Drugs**
- ✓ **Weapons**
- ✓ **Weapons or Explosives**
- ✓ **Mobile Phones or SIM Cards**
- ✓ **Inmate Communications**
- ✓ **And many other objects such as tools, money, keys, etc.**
