

Upper Room UV-C Light

R-ZERO Systems, Inc., Vice

Autonomous, LED-powered, IOT connected, Upper-Room UVGI Device

Key Benefits:

- **Effective and Consistent Disinfection**- Destroys 99.9%+ of most airborne viruses and bacteria in as little as 5 minutes. Changes total amount of air in the room 12 times per hour on average with disinfected air in 500 sf room
- **Cost Effective** – Autonomous operation for energy efficiency without costly modifications to HVAC system.
- **Intelligent Operation** - Senses occupancy and automatically powers on to immediately reduce risk and then connects to dashboard for tracking.

How it works:

- Install at minimum 7' height
- Shoots a powerful beam of UV-C across the upper area of the room
- Potentially contaminated air in the occupied zone rise to meet the beam and is disinfected on contact
- Natural airflow recirculates the disinfected air into the occupied zone.
