Mobile Data

MDIS (Mobile Data Information System)

Southern Software's MDIS is designed for employees to use in the field to transmit and receive important, time-saving information. The mobile nature of this application increases employees' productivity while keeping them visible in the communities your agency serves. Integration with Southern Software CAD and MDS improves officer safety and efficiency.

- Vehicle to vehicle and vehicle to dispatch chat
- Use your ESRI™ jurisdictional GIS map data
- RMS master name and paper search along with mug shots
- Southern Software CAD integration
- Update CAD notes, status
- Self-initiate CAD calls
- Zoom to call/unit on map
- Map address search
- User defined zooms on map
- TTS (Text-To-Speech)

MDIS Server Software Base (for 1-5 installed) with 1 In-House License - Includes Software, Project Management including 1 Session of User training and 1 Year of Support.
