CONTROL ROOM

Control Room is specifically designed for Command and Dispatch Centers using VISCE® Back Office technology to allow your dispatchers/officers to easily view, monitor and operate your ALPR system with greater ease and efficiency.

Control Room's web-based interface features easy to view Live Camera Windows for displaying images, time stamps, license plates and text of last 10 reads for every camera in real-time within a "tabbed" view of up to 8 cameras per tab.

Real-time Alerts allow for immediate notification of hotlist matches and make it easy to take appropriate action with full vehicle and Alert details.

Benefits

- Pro-actively navigate ALPR system with real-time situational intelligence monitoring
- Monitor crime hotspots and communities more efficiently with multiple-system, full-screen views
- Identify the most critical incidents and guide your officers with confidence using certifiable data and analytics
