

Your Comprehensive Federated Search Query for Law Enforcement

With something as critical as community safety, settling for outdated technology is no longer acceptable for law enforcement. With the **FocalPoint Federated Search Query**, you can implement an enterprise-wide search system that helps law enforcement personnel access the specific information they need when they need it. This helps to keep communities safer no matter what kind of threats may be looming.

FocalPoint is a customizable, web-based solution that unites disparate information from multiple sources, keeping all law enforcement personnel in the know. **FocalPoint** provides the following advantages:

- **Saves time and effort** — what used to be a manual process, taking 15-45 minutes to search for information on a person, now happens in minutes, saving valuable time and effort.
- **Parses out alerts** — FocalPoint returns data that includes alerting the user to whether a person is a violent felon, high risk sexual offender, has a warrant, is a domestic or mental health case, and any federal alerts.
- **Presents printable results** — Users are able to select the information they want and print to a PDF.

PURPOSE OF FOCALPOINT

FocalPoint provides security, accessibility and collaboration for your entire law enforcement team. Being able to unify disparate information from multiple sources gives all law enforcement personnel the information they need at their fingertips, while the ability to assign permissions and roles within the system ensures only specific members have access to certain information. FocalPoint is the ultimate tool to facilitate your best work as a team and help to make your communities safe and secure.

FOCALPOINT KEY FEATURES AND BENEFITS

Real-Time Federated Query

Users have the ability to query one or multiple disparate data sources simultaneously in real time

Role-Based Security

The system manages access to sensitive data via role-based security so you can control who has access

Web-Based Portal

FocalPoint is a web-based portal accessible from anywhere at any time on any platform

Streamlines Disparate Systems

Streamlines data from disparate systems to make it meaningful for law enforcement-related decision making

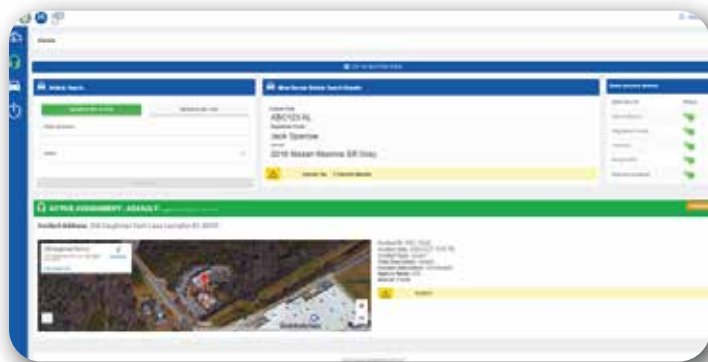

Law Enforcement Specific

The first solution of its kind designed specifically for community safety in the United States

Automation

Automated systems make it easier to conduct predetermined searches
