attenti

Attenti Beacon

Attenti's Beacon simplifies monitoring – saving users time reviewing hundreds of points. The Beacon is configured to work with the Attenti Tracker 1 (AT1) to provide secure monitoring.

Key Features:

Automated Notifications – When paired with the AT1, notifications of status changes are automatically sent to the monitoring software

Adjustable Range – Allows for customized range settings within a building

Internal Backup Battery – Automatically maintains its operation in the event of a power interruption
