mission-critical **asset management**

Mcm**tech** has been developing industry leading asset management software solutions for more than 20 years. Our Motion**deck** platform is the most flexible and scalable solution in the market, offering a wide range of applications to meet your needs.

which **solution** is right for you?

Commshop[™]

track, manage and maintain complex radio and communications assets, including in-house repair and maintenance services

Commasset[™]

track and manage complex radio and communications assets, but not in-house repair and maintenance

Motion360[™]

track, manage, and maintain complex assets, including in-house repair and maintenance services

Motiontrack[™]

track and manage complex assets, but not in-house repair and maintenance

what's included?

See the solutions chart on the back. For special needs beyond these core offerings, our team will work with you to customize your solution.

Mcm tech is constantly innovating so that our solutions evolve with your needs. Here are some of the key applications available for you today.		Commshop [®]	Commasset [®]	Motion360 [®]	Motiontrack [®]
	agencies organize records and manage the structure for the departments and locations you support	✓	✓	✓	✓
	assets maintain detailed records of your serialized and capitalized assets including location, assignment, configuration, purchase history, warranties, maintenance schedules, and more	✓	✓	✓	✓
	id mangement control how your IDs are assigned to each radio, preventing out-of-range and duplicate ID assignments	✓	✓		
	sites create profiles for each of your sites detailing location, equipment, vendors, access, lease agreements, licensing, and more	✓	✓		
	alerts stay informed of activity, changes, and due dates with automated email and on-screen notifications	✓	✓	✓	✓
	dashboards display and monitor the metrics that matter to you most with interactive graphs and charts	✓	✓	✓	✓
	work orders create work orders for service that track labor and materials costs and link records to agencies, assets, people, locations, vehicles and more	✓		✓	
	inventory monitor your stock of parts and supplies, including location, utilization, availability and cost	✓		✓	
	purchase orders issue orders to buy parts and supplies and fulfill orders to replenish your inventory	✓		✓	

asset management software

designed for organizations who need to track and manage radio communications and complex assets, but not in-house repair and maintenance

Track and manage your complex communications network and related assets with one powerful, user-friendly solution. Developed by Mcm**tech**, a leader in mission-critical asset management software, this solution is purpose-built for the communications industry.

Commasset helps you:

- save time and money by becoming more efficient, accurate, and accountable
- know where your equipment is and who it's assigned to
- incorporate unique configuration details into each asset record by category
- manage radio ID assignment so that IDs aren't duplicated or out-of-range
- automatically capture detailed history for each asset
- reduce risk of equipment loss
- be prepared for annual audits
- automate business processes and react more quickly with email and on-screen alerts
- accurately budget based on actual data and metrics

Comm**asset** is our entry-level asset management software solution for radio communications systems. Comm**shop** offers all of the features listed above, plus robust work order and inventory applications.

Built on Mcm**tech**'s Motion**deck** software platform, Comm**asset** includes the following applications:

agencies

organizes records for multiple departments and locations in one place

assets

maintains detailed records for serialized and capitalized assets

sites

stores key information in a detailed profile for each site

id mgmt

controls how radio system IDs are assigned

dashboards

visually displays and monitors the metrics that matter to you most

alerts

notifies you of activity, changes, and upcoming due dates

asset management software with an integrated work order system

designed for organizations who need to track, manage and maintain radio communications and complex assets

Manage every aspect of your mission-critical operations with one powerful, user-friendly solution. Developed by Mcmtech, a leader in mission-critical asset management software, this solution is purpose-built for the communications industry. Built-in work order and inventory applications let you fulfill service requests while linking the history, including labor and material costs, directly to asset records.

Commshop helps you:

- save time and money by becoming more efficient, accurate, and accountable
- know where your equipment and inventory is and who it's assigned to
- incorporate unique configuration details into each asset record by category
- manage radio ID assignment so that IDs aren't duplicated or out-of-range
- automate business processes and react more quickly with email and on-screen alerts
- automatically capture detailed history for each asset
- reduce risk of equipment **and inventory** loss
- **quickly create work orders for repair and maintenance**
- **easily update asset records while fulfilling service requests**
- **reduce downtime by keeping your equipment maintained and in service**
- **track historical cost of maintenance and repair for each individual asset**
- be prepared for annual audits
- accurately budget **for operational expenses** based on actual data and metrics

Commshop is our flagship communications-centric asset management software solution that includes a robust service management system. For our entry-level solution focused on communications asset management.

Built on Mcmtech's Motiondeck software platform, Commshop includes the following applications:

agencies

organizes records for multiple departments and locations in one place

alerts

notifies you of activity, changes, and upcoming due dates

assets

maintains detailed records for serialized and capitalized assets

work orders

creates work orders that track labor and material costs, linking to all relevant records

sites

stores key information in a detailed profile for each site

inventory

monitors your stock of parts and supplies, including location, utilization, availability, and cost

id mgmt

controls how radio system IDs are assigned

purchase orders

issues orders to buy parts and supplies and fulfills orders to replenish inventories

dashboards

visually displays and monitors the metrics that matter to you most

asset management software

designed for organizations who need to track and manage complex assets but not in-house repair and maintenance

Manage your complex network of assets, for numerous departments and locations, with one powerful, user-friendly solution. Developed by MCMtech, a leader in mission-critical asset management software, this solution can be used in any industry, for any type of asset management.

Motiontrack helps you:

- save time and money by becoming more efficient, accurate, and accountable
- know where your equipment is and who it's assigned to
- reduce risk of equipment loss
- automatically capture detailed history for each asset
- be prepared for annual audits
- automate business processes and react more quickly with email and on-screen alerts
- accurately budget based on actual data and metrics

Motiontrack is our entry-level asset management software solution. Motion360 offers all of the features listed above, plus work order and parts inventory applications. Click [here](#) for more information on the Motion360 solution.

Built on the powerful Motiondeck platform, Motiontrack includes the following applications:

agencies

organizes records for multiple departments and locations in one place

assets

maintains detailed records for serialized and capitalized assets

dashboards

visually displays and monitors the metrics that matter to you most

alerts

notifies you of activity, changes, and upcoming due dates

asset management software with an integrated work order system

designed for organizations who need to track, manage, and maintain complex assets including in-house repair and maintenance

Manages detailed records of all your assets, agencies, locations, and inventories in one powerful, user-friendly solution. Built-in work order and inventory applications let you fulfill service requests while linking service history, including labor and material costs, directly to asset records.

Motion360 helps you:

- save time and money by becoming more efficient, accurate, and accountable
- know where your equipment and inventory is and who it's assigned to
- reduce risk of equipment **and inventory** loss
- automatically capture detailed history for each asset
- automate business processes and react more quickly with email and text alerts
- **quickly create work orders for repair and maintenance**
- **easily update asset records while fulfilling service requests**
- **reduce downtime by keeping your equipment maintained and in service**
- **track historical cost of maintenance and repair for each individual asset**
- be prepared for annual audits
- accurately budget **for operational expenses** based on actual data and metrics

Motion360 is our expanded software solution. If you do not manage asset repair and maintenance in-house, you may be interested in our entry-level solution, Motiontrack which does not include the features bolded above. Click [here](#) for more on Motiontrack.

Built on the powerful Motiondeck platform, Motion360 includes the following applications:

agencies

organizes records for multiple departments and locations in one place

purchase orders

issues orders to buy parts and supplies and fulfills orders to replenish inventories

assets

maintains detailed records for serialized and capitalized assets

dashboards

visually displays and monitors the metrics that matter to you most

work orders

creates work orders that track labor and material costs, linking to all relevant records

alerts

notifies you of activity, changes, and upcoming due dates

inventory

monitors your stock of parts and supplies, including location, utilization, availability and costs

Quartermaster

Issue, track and manage
equipment and inventory with
one easy-to-use software

- ✓ manages the distribution of serialized assets and consumable inventory to agencies, people, vehicles and locations in a single transaction
- ✓ creates a historical log of all equipment and inventory issued over time
- ✓ notifies users when orders are placed and fulfilled, and when inventory levels are low
- ✓ allows users to request assets and inventory items through a user-friendly shopping cart

Simpler processes.
Improved tracking.
Increased accountability.
