

ASTRO Managed Detection & Response

Motorola Solutions' ASTRO® 25 Managed Detection and Response provides radio network security element monitoring by experienced, specialized security technologists with extensive experience working with ASTRO 25 mission-critical networks. For highly complex or unusual security events, Motorola Solutions' technologists have direct access to Motorola Solutions engineers for rapid resolution.

Our solution provides 24x7x365 Security Operations Center Support. This is a component of our broader proprietary SOC 2 Type 2 certified Managed Security Platform targeted to Public Safety, Critical Infrastructure, and State/Local municipalities.
