VML 750

LTE VEHICLE MODEM

VML750 LTE Vehicle Modem harnesses the power of Verizon 3G/4G LTE and Band 14 Public Safety LTE, providing high speed data with the priority, control, security and performance required by Government & Public Safety agencies and may also be used to

empower employees in operations-critical roles at business and industrial enterprises.

RESELLER VERSION

UNIQUE DESIGN

Supports 2 SIM cards for Verizon 3G/4G LTE, Private LTE B20 network and Public Safety LTE B14 for FirstNet

Roof-mounted external antennas with Multiple-In-Multiple-Out (MIMO) configuration for extend range and data speed

Mobile WiFi 802.11b/g/n 2.4 GHz Access Point supports up to 32 simultaneous users with 164 ft (50 m) line-of-sight range

Flexible mounting options for installation in a mass transit bus, school bus, utility truck, patrol car, fire apparatus or ambulance.

Built-in GPS with vehicle tracking, route optimization and integration of Computer Aided Dispatch (CAD) services

MIL-STD 810G rated ruggedized design withstands heat, cold, rain, humidity, dust and vibration

IP66 sealed for protection against tight dust and powerful water jets

Wired Connectivity: 1 Ethernet port (10/100 Mbps, RJ-45) and 1 USB 2.0 port

Optional CRYPTR FIPS-140-2 compliant security storage module

APPLICATION EXAMPLES

Mass Transit Busses and Trains - real time location tracking with live video feed or internet access for passengers

School Bus - real time location tracking with live video feed and student boarding and departure record

Utility Truck - high speed work ticket updates with instant status reports

Private security patrol car - real time location tracking, live video and inspection reports

Ambulance - access patient records, medical history, insurance information and transmit vital statistics while still in route

Limousine Service - provide Wi-Fi connection for high profile clients, especially for international business travelers who need data service

NITRO PRICE PAGES OVERVIEW

General Information:

Nitro is the next generation professional communications solution that combines business-critical voice with lightning-fast private broadband data. It utilizes the Citizens Broadband Radio Service (CBRS) spectrum. Nitro delivers reliable, clear push-to-talk over a private broadband data network. All of this is

Features:

reatures:	
- 2-4x WiFi Range	 Simplified provisioning
- 2x WiFi Capacity	 Centralized, web-based configuration
 Cloud-based core (aaS) 	- Interoperation with LMR (WAVE)

- Security and access control - Transparent device updates - Simple network architecture

Below is a brief summary of each of the Nitro Price Page tabs included here:

"NITRO Infrastructure - Capital" Option
- All Nitro hardware components (CBSD, Routers, OnPrem Edge Gateway, and PTP Servers) are offered for purchase in the Capital Purchase model ("Capital").- A smaller monthly service fee (Software User Agreement) is still required to connect to the Nitro Cloud Core a

"NITRO Infrastructure - Monthly Service Fee" Option

- Key Nitro hardware components (CBSD, Routers, OnPrem Edge Gateway, and PTP Servers) are offered for a monthly service fee (Software User Agreement) that includes equipment usage, Nitro Cloud Core connection fees, as well as Essential Service with Advanced R

Nitro Recommended Switches - Switching equipment can be purchased by the Dealer through MOL, COEE or other means.

- Alternatively, Partners and Customers can provide thier own switching ("BYOD Switches"), however certain requirements must be met to satisfy the NITRO switching requirements. Please see the Nitro System Planner for details on "BYOD !

Nitro User Equipment & SIM's
- All Nitro End Users devices that connect to a Nitro network require a Nitro SIM card. These can be purchased through MOL- All Nitro End User devices require a data plan (Software User Agreement) to connect to a Nitro network. There are only two (2) flavors: Bas

Ancillary Items

- This tab provides a list of commonly used optional hardware items for a Nitro network. They include items such as antennas, line, mounting equipment, AC/DC converters, arrestors, and Fiber jumpers. - Ancillary equipment can be purcha:

NOTE: For additional information on the certification process, Nitro, and the "Nitro Request Form," please visit Partner Central. Please consult the Nitro System Planner for a detailed list of required equipment for designing and deploying a Nitro network. #VALUE!

NITRO RESELLER PRICES - CAPITAL OPTION

General Information:

Nitro is the next generation professional communications solution that combines business-critical voice with lightning-fast private broadband data. It utilizes the Citizens Broadband Radio Service (CBRS) spectrum. Nitro delivers reliable, clear push-to-talk over a private broadband data network. All of this is

Features:

- 2-4x WiFi Range	 Simplified provisioning 	- Security and access control
- 2x WiFi Capacity	 Centralized, web-based configuration 	 Transparent device updates
 Cloud-based core (aaS) 	 Interoperation with LMR (WAVE) 	 Simple network architecture

Each Initial NITRO Network is comprised of the following components: - 2 Routers (Juniper SRX 345 Firewall/Router) connected to the Nitro Cloud Core

- 1-X Edge Timing Master (uFalconSTG/MXG PTP) for timing to CBSD's w/o access to GPS (eg, Indoor CBSD's)
 SLX 2000's, SLX 4000's and SLX 5000's CBSD's to provide NITRO coverage & capacity.
- Optional NITRO On-Prem Edge Gateways

NOTE: Nitro CBSD's and Infrastructure components below are not available to order on MOL. Channel Partners must be certified and go through the Center of Excellence Engineering (CoEE) Team using the "Nitro Request Form." For additional information on the certification process, Nitro, and the "Nitro Request Form," please visit Partner Central.

All SLX purchased still require monthly Software User Agreements for connecting to the Nitro Cloud Core. (See below)

All NITRO monthly Software User Agreements are activated through the Nitro Portal after installation and require minimum two (2) year contracts. All SLX CBSD's require:

a minum of one (1) SRX345 Router for connection to the Nitro Cloud (two recommended) a timing source; either GPS or minimum of one (1) FibroLAN PTP server

Please consult the Nitro System Planner for a detailed list of required equipment for designing and deploying a Nitro network. Customer-specific WAN IP information may be required for Firewall/Routers if Static IP is desired. Please see the Nitro System Planner for DHCP and Static IP requirements. See Partner Empower agreements for more detailed service terms and conditions.

Infrastructure Repair:

Motorola's authorized Repair Depot will repair or coordinate the repair or replacement of the Infrastructure equipment provided by Motorola, including third-party infrastructure equipment supplied as part of the system solution. The Repair Depot will manage the logistics of equipment repair/replace (including shipment and return of repaired equipment), repair or replace Motorola equipment, and coordinate the repair or replacement of third-party soluti nent of third-party solution compo Repair for certain network elements may be conducted on-site by Motorola's vendors or partners. Customer will pay shipping costs to Motorola. For more information, refer to the Nitro Infrastructure Essential Statement of Work or contact your Motorola representative or your Motorola Customer Support Manager.

http://ecat.comm.mot.com/ecat/pricebooks/dup/infrep2.htm

Infrastructure Repair with Advanced Replacement:

In addition to Infrastructure repair, Motorola Solutions provides Advanced Replacement hardware exchange service for all Nitro infrastructure supplied by Motorola Solutions under the Monthly Service Fee sales model or as an Optional service on the CapitalPurchased sales model. Motorola will provide Customer with an advanced replacement unit(s) or Field Replacement Units (FRU's) in exchange for Customer's malfunctioning Equipment. Malfunctioning Equipment will be evaluated and repaired by the infrastructure repair depot and returned to the depot's inventory upon completion of repair for use in subsequent Advanced Replacement: Optional Adv Replacement is available, purchased yearly for a given contract, and includes the following equipment

Pricing is calculated by taking the unit price times the quantity of units purchased in that system.

i ficing is calculated by taki	ing the time price times the quantity of times parentased in that system.

Literature & Information (Available on Motorola Online and/or Partner Central): #VALUE!

Advanced Replacement:

In order to access a Nitro Network, a Nitro SIM card is required prior to activation. This applies to MSI Radios and BYOD devices. Nitro SIM cards can be ordered via MOL.

User Data Plans are purchased & activated via the Nitro Portal.

Orchestrate

Orchestrate is a cloud-based platform that connects across voice, data, video, software, and analytics, helping administrators to control their integrated technology ecosystem more effectively. Using its intuitive, drag-and-drop user interface, administrators can create rule-based, automated workflows to enhance efficiency, shorten response times, and improve overall safety

SAFETY REIMAGINED ORCHESTATE

Partner Qualifications for Activating Orchestrate

1. Partner must be eligible as a Safety Reimagined Partner (i.e., reseller of both MOTOTRBO and Avigilon) only. See the <u>onboarding guide</u> (must be logged in to Partner Central to view guide) for more information. 2.

How to Request an Orchestrate Activation

Qualified Safety Reimagined partners with an active Orchestrate program relationship can activate Orchestrate as follows: 1. Partner must contact a Motorola Solutions CSE to register each customer opportunity an

MOTOROLA EDGE NODE FOR MOTOTRBO[™] ALL SYSTEM TYPES VHF/UHF/800/900 MHz

Contraction of the

RESELLER PRICES

The Motorola Edge Node Includes:

- 2 120 VAC Power Cables

- 2 Rack mounting ears

Please refer to the Motorola Gateway to LMR Network (MGLN) System Planner for more details on Motorola Edge Node configurations and features.

General Information:

Motorola Gateway to LMR Network (MGLN) is a multi-tenant service that allows MOTOTRBO systems to connect to cloud-hosted and on-premise applications such as location mapping solutions using a modern, unified set of cloud-hosted APIs.

Motorola Gateway to LMR Network (MGLN) supports MOTOTRBO radio systems from conventional system, through IP Site Connect, Capacity Plus (single site and multi site) to Capacity Max.

NOTE:

- The Motorola Edge Node, Model #: T8752B is not available to order on MOL. Channel Partners must go through the Center of Excellence Engineering (CoEE) Team.

Orchestrate Request Form

- The Motorola EDGE Node peripherals can be ordered by COEE team too or Channel Partner can order thru COF or MOL directly

- ST Support Services will be mandatory for all Motorola Gateway to LMR Network (MGLN) purchases unless the Channel Partner has completed the Motorola Gateway to LMR Network (MGLN) training requirements. This will be verified by the CoEE Team. Classes can be accessed via the Learning Management Portal: https://learning.motorolasolutions.com/. ats.support@motorolasolutions.com
