

Tailgate Spreader

**GOOD
ROADS**
Since 1878™

By Godwin 1-800-637-7651

Good Roads under tailgate spreader is designed for trucks that are equipped with a central hydraulic system. It can spread bulk salt, salt/sand mixes and works with 96" wide dump bodies. The spreader is built with corrosion resistant 201-2B stainless steel. A 6" auger with 3/8" flighting is powered by a Parker hydraulic motor which provides steady material flow. The auger is supported by a large 2-1/8" ID bearing for superior performance. A three-point hinged bottom cover allows easy access to the entire auger assembly and hassle-free cleaning. Tall spill shields are standard. The 18" poly spinner is also powered by a durable Parker hydraulic motor. The spinner and spreader chute are easily folded away for infield maintenance. This spreader also features quick disconnects for trough removal and service.

Available options

- Gear box
- 9" Auger
