MODEL #117-D12
FLASHING BEACON SERIES

The 24/7 Flashing Regulatory Beacon features a 12 inch ultra-bright red colored LED to draw drivers' attention to regulatory signs such as Stop, Yield, Do Not Enter, and Wrong Way. The beacon is solar powered which is a proven reliable power source. Solar power is a great benefit by allowing the freedom to locate or relocate a sign any where it is needed worry-free of power lines, road boring, costly easements or monthly power bill.

A Clean and Clutter-Free Control Box.
K&K Systems utilizes just 2 components to operate the 24/7 Flashing Beacon Series — a battery and the K&K Systems' SPLasher Beacon Controller, compact all-in-one solar controller. This design not only provides for simple maintenance, but also retrofits easily to any existing sign. We use a maintenance-free, sealed battery to eliminate any possible spills. Furthermore, the battery can be purchased locally if it should ever fail.

NCHRP 350 Crash Tested and Accepted (National Cooperative Highway Research Program)

Meets ITE Standards (Institute of Transportation Engineers)

Meets MUTCD (Manual on Uniform Traffic Control Devices).
