

Super Products® Superjet® Truck Mounted Jetter

high pressure sewer cleaning

- › Great for when municipal and residential sewer cleaning only requires jetting debris and not vacuuming
- › The industry's strongest and smoothest single piston water pump
- › Water tanks are rotationally molded polyethylene in a modular design that accommodates a range of water capacities

SPECIFICATIONS

GENERAL DIMENSIONS

- Length: 25' 6" (approx.)
- Height: 10' 11" (approx.)

DRIVE SYSTEM

- Single engine drive
- Pressure sensitive and flow compensating water pump
- Hydraulically powered by engine PTO

WATER SYSTEM

- 100 gpm & 3000 psi capable double acting, pressure sensing single piston water pump
- Groove lock water supply plumbing
- 1.25" dia water supply plumbing to hose reel
- Dual Nitrogen charged Accumulators
- Adjustable engine throttle with water pressure speed dial
- Pump can be serviced without removal from unit

OTHER FEATURES

- Adjustable tilt control panel
- Corrosion resistant polymer coated subframe inside cabinet
- Aluminum rear cabinet (1/8" thickness minimum)
- Air purge for water system winterizing
- 1000' capacity hose reel that rotates 200° and extends 60" from home position
- (3) anodized aluminum roll up doors
- (2) Water Tanks, 1080 gallons water capacity
- Dual fill gives ability to fill unit with water from both sides

OPTIONS

- Additional Water Tanks; up to 4 more for a total of 3240 gallons water capacity
- 80,000 BTU in cabinet heater
- Fully Automatic Powered Level Wind (goal post style)
- Hose Reel Tensioning
- Hydrant Fill with automatic shut off
- Multiple Truck Chassis Configurations
- Rear Canopy
- Toolbox Package: (5) toolboxes
- Water Tank Side Panels
- Winter Recirculation
