

HDXL-903

Above Ground Single Scissor Lifts

ARI-HETRA's Above Ground Single Scissor Lifts make changing a clutch, inspecting shocks, and other services much easier and quicker. The lifts require very little floor modifications and are available in a variety of capacities.

Features

- Sealed bronze and graphite pivot points (strong, durable, low maintenance).
- Surface mounted.
- Platforms wide enough for dual-wheeled vehicles.
- Automatic wheel chocks fall into place when vehicle is lifted.
- Optional lifting crosspiece, light kit, and drive-thru ramps.
- Optional galvanized finish for wash bay applications.

Safety

- **Maximum capacity controlled by an overload safety valve.**
- **Mechanical safety latching mechanism.**
- **Smart hydraulics help maintain a level lifting surface.**
- **Models HDXL-902 and 903 are ALI certified through NRLT MET Labs.**
