Bottom-Trip Rubber Cutting Edge Kit

Today's street and road managers are faced with low-noise requirements and a variety of delicate surfaces. Meyer rubber cutting edges are designed to eliminate noise while providing maximum protection to the surface. Our 1.5-inch-thick edge is formulated for long life. All Meyer rubber cutting edges are also reversible to extend cutting edge life. Once a side is worn, simply reverse it for extended use. Meyer moldboards and cutting edges are pre-drilled and ready for installation. Cutting edges are sold as complete kits or separately as required.

Note: Complete Kits come with all hardware in order to install.

Bottom-Trip Polyurethane Cutting Edge Kit

Today's pros are faced with many requirements and stipulations from their customers. Polyurethane cutting edges provide the rigidity of steel edges, and the noise reduction of rubber edges, all while protecting sensitive surfaces. Our one-inch-thick edge is formulated for long life. Bottom-trip cutting edges are also reversible to extend the life, once a side is worn, simply reverse the cutting edge for extended use. Meyer moldboards and cutting edges are pre-drilled and ready for installation. Cutting edges are sold as complete kits or separately as required.

Note: Complete Kits come with all hardware in order to install.

Curb Guards

Protect the edge of your Meyer plow from driver abuse and hidden obstructions. Made with 3/8-inch steel, Meyer's curb guards are easy to install with pre-drilled-hole pattern, curved and contoured for a perfect fit. Comes as a set (2) and are interchangeable/reversible side to side. Ships with mounting hardware and installation instructions for an easy install.

Curb Guards

Meyer Rubber Snow Deflectors

Made of pliable rubber, deflectors keep snow flume down and away from the windshield and accentuate the snow rolling action. Meyer moldboards are pre-drilled and ready for deflector installation. Deflector complete kits come ready-to-install with hardware bag and steel mounting belt. Components also sold separately as required.

Note: Complete Kits come with all hardware in order to install.

8.5 ft Steel

9.5 ft Steel

Snow Shoes Super-V

Meyer Super-V Snow Shoes are designed to set the scrapping height of the cutting edge. It is common for the edge to run 0.5-inch to 1-inch higher than the surface when plowing gravel driveways/lots or other ground-sensitive surfaces. The Super-V shoe is a heavy-duty steel cast for maximum longevity and durability. The mushroom design will rotate 360 degrees eliminating hang-ups or catching of unwanted objects. In addition, the mushroom design is convenient for back-dragging applications. Fits all Super-V moldboards. Shoes come as a set (2) or are sold individually, and include all mounting hardware for easy installation.

Snow Shoes Only
