RADAR SPEED MONITOR ER12 WRAP AROUND POLE MOUNT

The ER12 Wrap Around Pole Mounted Radar is engineered to be lightweight and durable. The sign and radar combination are just over 2" in depth making it lightweight and easy to manage when installing. Additionally, only 2 bolts are required to mount the unit onto a square or u-channel post. We recessed the display into an aluminum sign for strength. The matte black front reduces glare. The efficient use of LEDs and reinforced Lexan face reduces exposure to damage.

With K&K Systems Quick Selection Switch you are able to change your *over speed violator alert* speed and the *blanking violator alert* without need of a CPU which allows the field workers to simply push the button to desired speed threshold.

Light, efficient, simple. What could be better?
