- Training during installation
- Total Length 18’
- Width 7’
- Height 6’6”

It is suitable for cleaning drains and sewers from 1" to 18" in diameter. The country's original "high pressure-low flow" sewer jetting unit, this Harben trailer still holds a dominant place in the market.

At the heart of the ET180 trailer jetter is our own Harben 'P' type high pressure diaphragm pump. It produces up to 4000 psi and up to 18 gpm and covered by a 5 year warranty. Peace of mind is guaranteed when you buy a Harben trailer jetter. Check out the unique advantages of the Harben in the video below.

It can clear blockages, descale and root cut which makes it the perfect choice when working in domestic and light commercial situations. The ET180 has enough jetting power to drive our complete range of nozzle accessories with ease. Used in numerous applications from residential and commercial drains, to factories, farms and food processing plants.

Powerful yet compact it is built on a rugged twin axle 3/16" steel tube trailer which is shot blasted and powder coated so able to resist all climates. A full weather canopy is fitted over the latest low emission 50hp diesel engine, providing clean power, certified for use across the country. The water tank holds an impressive 750 gallons and the 180° pivoting hose reel makes getting to awkward drains a lot easier.
