The Responder Class

Air, Light, and Haz Mat Response Trailer

Introducing the Responder 13

The Responder Class of Air and Light Trailers is perfectly suited to meet your mobile breathing air needs. The Responders are built on a 16-foot tandem-axle trailer and are equipped with a rugged BAUER diesel compressor (either 13 or 25 cfm) and more than 2000 cubic feet of stored air. The trailer provides air, lights (powered by generator), a workbench, compressor, storage space for spare SCBAs, hazmat suits, or other items, and a lighted work area that is sheltered from the weather.

The standard Responder comes loaded with:

- Protected inside work area, with work bench, and an interior, dual lighting system (12/120 volt).
- BAUER 6000psi compressor, either 13 cfm or 25 cfm (you choose).
CFS5.5-2Sx4x4 BAUER containment-style fill station, to meet NFPA 1901 standards.
- Fills two SCBAs at once, up to 5500psi
- Four 6000psi UN/DOT cylinders, to hold 2036 cubic feet of stored air.
- CO Monitor, to meet NFPA 1989 standards.
- Custom deluxe trailer, 16-foot tandem-axle torsion bar suspension.
- Divider wall venter windows for easy access, maximum ventilation.
- 6 KW generator with diamond plate cover, tongue-mounted with power cord to run from the generator to the trailer.
- Built-in cabinets for storage, can carry 14 spare SCBA cylinders (SCBAs not included). Also a deluxe first aid kit.
- Two 12 volt rewind hose reels, one low pressure and one high pressure, each with 100 feet of hose. These come with a custom control panel.
- Two trailer-mounted 120 volt, 750 watt extendable lights and extension cords

Some of the available options are:

- 25 cfm compressor
- Air conditioning
- Electric tongue jack
- Power awning 12'
- Ramp door, instead of barn doors
- Scene lights
- Spare tire & mount
- Stand light upgrade
- Rubber coin floor, instead of diamond plated
